### A Guide to Detracking Math Courses Angela Torres, Ho Nguyen, Elizabeth Hull Barnes, Laura

Wentworth, 2023-05-03 Create a pathway to equity by detracking mathematics The tracked mathematics system has been operating in US schools for decades However research demonstrates negative effects on subgroups of students by keeping them in a single math track thereby denying them access to rigorous coursework needed for college and career readiness The journey to change this involves confronting some long standing beliefs and structures in education When supported with the right structures instructional shifts coalition building and educator training and support the detracking of mathematics courses can be a primary pathway to equity The ultimate goal is to increase more students access to and achievement in higher levels of mathematics learning especially for students who are historically marginalized Based on the stories and

lessons learned from the San Francisco Unified School District educators who have talked the talk and walked the walk this book provides a model for all those involved in taking on detracking efforts from policymakers and school administrators to math coaches and teachers By sharing stories of real world examples lessons learned and prompts to provoke discussion about your own context the book walks you through Designing and gaining support for a policy of detracked math courses Implementing the policy through practical shifts in scheduling curriculum professional development and coaching Supporting and improving the policy through continuous research monitoring and maintenance This book offers the big ideas that help you in your own unique journey to advance equity in your school or district s mathematics education and also provides practical information to help students in a detracked system thrive

**Evidence and Public Good in Educational Policy, Research and Practice** Mustafa Yunus Eryaman,Barbara Schneider,2017-06-22 This volume draws together interdisciplinary approaches from political philosophy social work medicine and sociology to analyze the theoretical foundations and practical examples of evidence based and evidence informed education for the public good It presents a range of conceptions of the evidence based and evidence informed education and a justification for why the particular examples or issues chosen fit within that conception for the sake of public good It explores the current literature on evidence based and evidence informed educational policy research and practice and introduces a new term evidence free meaning actions of some policymakers who disregard or misuse evidence for their own agenda The demands about the quality and

relevance of educational research to inform the policy and practice have been growing over the past decade in response to the Evidence Based Education movement. However, the literature is yet to tackle the question of the interrelationships between evidence, research, policy and practice in education for the public good in an international context. This book fills that gap.

*Thinking Ecologically in Educational Policy and Research* Sarah Winchell Lenhoff, Jeremy Singer, Michael Gottfried, 2024-02-29. This book places a focus on educational ecosystems that is understanding the complex nature of educational experiences and promoting a coordinated set of policy and practice solutions to address interrelated problems that manifest in school and student outcomes. Educational policy and politics have been dominated by school improvement initiatives that locate educational problems and solutions in schools themselves rather than in the systemic and structural roots of those problems: segregation, poverty and histories of compounding inequality. Youth outcomes that we associate with schools, e.g. achievement, attendance, graduation, are the consequences of systemic, structural and environmental factors that interact with the lived experiences of students in their communities and schools. This insightful volume provides examples of how to understand and analyse educational issues ecologically and evidence on the opportunities and challenges with forging cross sector partnerships to address educational issues ecologically. *Thinking Ecologically in Educational Policy and Research* will be a key resource for practitioners and researchers of education leadership and policy, educational administration, educational research, educational studies and sociology. This book was originally published as a special issue of the *Peabody Journal of Education*.

**Handbook of Research on Field-Based Teacher Education** Hodges, Thomas E., Baum, Angela C., 2018-10-26. Teacher education is an evolving field with multiple pathways towards teacher certification. Due to an increasing emphasis on the benefits of field based learning, teachers can now take alternative certification pathways to become teachers. The *Handbook of Research on Field Based Teacher Education* is a pivotal reference source that combines field based components with traditional programs, creating clinical experiences and on the job learning opportunities to further enrich teacher education. While highlighting topics such as certification, design, preparation programs and residency models, this publication explores theories of teaching and learning through collaborative efforts in pre-Kindergarten through grade 12 settings. This book is ideally designed for teacher education practitioners and researchers invested in the policies and practices of educational design.

*International Encyclopedia of Education*, 2009-04-17. The field of education has experienced extraordinary technological, societal and institutional change in recent years, making it one of the most fascinating yet complex fields of study in social science. Unequalled in its combination of authoritative scholarship and comprehensive coverage, *International Encyclopedia of Education* Third Edition succeeds two highly successful previous editions (1985, 1994) in aiming to encapsulate research in this vibrant field for the twenty first century reader. Under development for five years, this work encompasses over 1 000 articles across 24 individual areas of coverage and is expected to become the dominant resource in the field. Education is a multidisciplinary and international field.

drawing on a wide range of social sciences and humanities disciplines and this new edition comprehensively matches this diversity The diverse background and multidisciplinary subject coverage of the Editorial Board ensure a balanced and objective academic framework with 1 500 contributors representing over 100 countries capturing a complete portrait of this evolving field A totally new work revamped with a wholly new editorial board structure and brand new list of meta sections and articles Developed by an international panel of editors and authors drawn from senior academia Web enhanced with supplementary multimedia audio and video files hotlinked to relevant references and sources for further study Incorporates ca 1 350 articles with timely coverage of such topics as technology and learning demography and social change globalization and adult learning to name a few Offers two content delivery options print and online the latter of which provides anytime anywhere access for multiple users and superior search functionality via ScienceDirect as well as multimedia content including audio and video files
