Republican, First, Last, and Always Suzanne Bowers, 2010-02-19 Republican First Last and Always A Biography of B Carroll Reece examines the political culture that created an intense fervor of anti communism in America From 1920 to 1961 B Carroll Reece served a then unprecedented thirty five years in the United States House of Representatives A close friend of Robert Taft Reece served as Chairman of the Republican National Committee from 1946 1948 and used his position as chairman to push anti communism to the forefront of the Republican Party s national agenda and to help Taft try to win the presidency His background in finance and economics led him to believe that capitalism remained America s strongest defense against communism He worked to eradicate any threat to the capitalist system from trying to block government development of the Muscle Shoals Dam projects in Alabama in the 1920s to forming a congressional committee that attacked foundations created by the Ford Rockefeller and Carnegie families in the 1950s Reece s downfall and death represented the demise of Old Guard conservatives within the Republican Party as new leaders and new issues became the center of Republican politics and his investigation contributed to the animosity towards foundations and large concentrations of wealth that continues today

Gertrude Stein and Richard Wright M Lynn Weiss,M. Lynn Weiss,2008-08-18 After the Second World War Gertrude Stein asked a friend s support in securing a visa for Richard Wright to visit Paris I ve got to help him she said You see we are both members of a minority group The brief little noted friendship of Stein and Wright began in 1945 with a letter Over the next fifteen months the two kept up a lively correspondence which culminated in Wright s visit to Paris in May 1946 and ended with Stein s death a few months later Gertrude Stein and Richard Wright began their careers as marginals within marginalized groups and their desire to live peacefully in unorthodox marriages led them away from America and into permanent exile in France Still the obvious differences between them in class ethnic and racial origins and in artistic expression beg the question What was there to talk about This question opens a window onto each writer s meditations on the influence of racial ethnic national origins on the formation of identity in a modern and post modern world The intuitive and intellectual affinities between Stein and Wright are illuminated in several works of non fiction Stein s *Paris France* and Wright s *Pagan Spain* are meditations on expatriation and creativity Their so called homecoming narratives Stein s *Everybody s Autobiography* and Wright s *Black Power* examine concepts of racial and national identity in a post modernist world Respectively in *Lectures in America* and *White Man Listen* Stein and Wright outline the ways in which the poetics and politics of modernism are inextricably bound At the close of the twentieth century the meditations of Stein and Wright on the protean quality of individual identity and its artistic social and political expression explore the most prescient and pressing issues of our time and beyond M Lynn Weiss is an assistant professor of English and African American literature at Washington University

Transition in Power Peter J. Hugill,2018-08-15 Hegemonic transitions are never clear and they usually emerge from a period of multi polarity in the world system Two types of state tend to contend for power trading states and territorial states although most states are never pure and tend to contain within them multiple polities with different agendas This book describes the hegemonic transition between two major trading states Britain and America British decline began in the late Victorian era but the transition to American power was slow and other states also sought hegemony Transitions between trading states focus on economic struggle though struggles between trading and territorial states and between territorial states are marked by armed conflict In 1919 President Woodrow Wilson saw three arenas of competition developing between Britain and America in international transportation international communication and petroleum But Britain was challenged economically by America as early as 1861 via the Morrill Tariff her economic hegemony was gone by the 1880s and she was defeated by 1947 From the 1880s on both America and Germany sought to replace Britain as hegemonic power not only through their implementation of protectionist economic policies but also through the adoption of revised versions of the

world economy through new technologies and in the case of Germany military power Britain struggled to stay in place Britain's world economy was that of a pure trading state Maritime trade in organic materials was organized through global capitalism and control over submarine cable telecommunications rather than territorial possession America's rise was greatly helped by being a capitalist power in possession of a secure territorial base in the mid section of the North American continent but America suffered from multiple polities competing for power with the South particularly problematic Germany developed a radically new world economy that synthesized resources using organic chemistry German science and technology began to diffuse to American corporate laboratories before World War One After that war diffusion to American laboratories and universities was massive and helped secure American hegemony *Congressional Record* United States.
