Assembling the Base

1. Align the front and back pieces of the base (pieces labeled 1 and 2), with "UP" pointing up, and snap together. If it does not go together, make sure "UP" is in the same direction on both pieces.
2. Place the top cover (piece 3) on top of pieces 1 and 2 (front and back). Press down firmly until it snaps into place.
3. Turn the assembly over and place the bottom cover (piece 4) on top of pieces 1 and 2 (front and back). Press down firmly until it snaps into place.
4. Turn base over and place the dispenser on top of the base.

Loading the Dispenser

Sanitize the dispenser water tank prior to installing a full bottle of water for the first time (see "Cleaning and Sanitizing the Water Tank").

IMPORTANT: Make sure the dispenser is unplugged. Before placing the water bottle on the dispenser, wash hands and wipe the top of the bottle with a clean cloth. Avoid touching the part of the bottle that will be in contact with the water dispenser.

Make sure the water level in the top of the dispenser is low enough to allow for proper bottle installation. Failure to do so may cause the dispenser to overflow.

1. Peel the label from the top cover of the bottle (if present). Do **not** remove the entire bottle cap.

2. Place the bottle on top of the dispenser as shown, aligning the dispensing valve probe to the center of the water bottle cap. Press down until the probe penetrates the bottle cap, allowing the bottle to rest on the support collar.
3. **IMPORTANT:** Press both dispense levers until water runs from both taps.
4. Plug in the dispenser.
5. Allow 30 minutes for water to reach cold temperatures.

Contact a local water bottle distributor to purchase water bottles.
