GED Test Changes and Attainment Kara Larson, Cristina Gaeta, Lou Sager, 2016 In January 2014 the GED Testing Service significantly redesigned the GED test to incorporate the Common Core State Standards and the College and Career Readiness Standards for Adult Education The purpose of this study was to examine the significant changes made to the test in 2014 examine the impact of the changes on Washingtonians and make recommendations to achieve the state's two educational attainment goals The report presents available summary data from the GED Testing Service's annual statistical reports years 2008-2013 At the time of the study the GED Testing Service had not published state or national data for years 2014 and 2015 therefore the study analyzed 2014 and 2015 state summary data from Washington's State Board of Community and Technical Colleges and preliminary 2014 national summary data published by the National Council of State Directors of Adult Education Results show that coinciding with the changes to the GED test the number of test takers completers and passers plummeted Test participation decreased by 62.8 percent in 2013 over 22,000 Washingtonians took the test compared to fewer than 9,000 in 2014 The test completion rate decreased by 33.7 percent in 2013 over 18,000 test candidates completed all four subject areas of the test compared to just over 4,000 in 2014 In 2013 over 15,000 completers passed the test compared to just over 3,000 in 2014 From 2008 to 2013 more than 4 percent of Washington adults without a high school credential took the test compared to 1.5 percent in 2014 which has consequences for the Washington's educational attainment goals Possible reasons for the decline in numbers are explored Further research is recommended The following are appended 1 Comparison of 2002 GED test series to 2014 GED test series 2 Alternative pathways to high school completion and 3 Data Tables Contains endnotes

The Welfare Trait Adam Perkins, 2016-01-26 The welfare state has a problem each generation living under its protection has lower work motivation than the previous one In order to fix this problem we need to understand its causes lest the welfare state ends up undermining its own economic and social foundations In *The Welfare Trait* award winning personality researcher Dr Adam Perkins argues that welfare induced personality mis development is a significant part of the problem In support of his theory Dr Perkins presents data showing that the welfare state can boost the number of children born into disadvantaged households and that childhood disadvantage promotes the development of an employment resistant personality profile characterised by aggressive antisocial and rule breaking tendencies The book concludes by recommending that policy should be altered so that the welfare state no longer increases the number of children born into disadvantaged households It suggests that without this change the welfare state will erode the nation s work ethic by increasing the proportion of individuals in the population who possess an employment resistant personality profile due to exposure to the environmental influence of disadvantage in childhood
