Quinley, 2020-06-15 Immunohematology Principles and Practice Third Edition, an ideal text for anyone who wants to master the theory and practices of today's blood banking. **Genetic Mapping and Marker Assisted Selection** N. Manikanda Boopathi, 2012-12-12 Genetic mapping and marker-assisted selection (MAS) is considered as one of the major tools in genetic improvement of crop plants in this genomics era. This book describes basics in linkage mapping, step by step procedure to perform MAS, achievements made so far in different crops, and limitations and prospects of MAS in plant breeding. It summarizes all this in a simple but comprehensive mode using suitable examples so as to explain the concept and its historical developments. To summarize, this book describes technologies for identification of genes of interest through genetic mapping, recaps the major applications of MAS to plant breeding, lists examples in which MAS is being applied to various breeding programs, and emphasizes the various difficulties that limit the application of MAS in plant breeding, providing possible solutions to overcome these difficulties, and finally tries to illustrate the future prospects. This book would be a valuable guide to the undergraduates and postgraduates of agricultural universities and institutes that are interested and/or involved in genetic improvement of crop plants using modern tools.
