Philosophy in Statistics 陈 / Chen Ligong, 2025-05-20 This book revisits the history of statistics and by focusing on the critical turning point across the 1920s and 1930s redraws the proper trajectory of its development It expands the theoretical and algorithmic foundations of statistics from the special case of the normal distribution arithmetic mean \bar{A} to the more general framework of centralized distribution convex self weighted mean \bar{C} thereby providing a philosophical historical and algorithmic foundation for reconstructing the discipline Grounded in fundamental principles of epistemology the book systematically introduces new statistical ideas and methods achieving key breakthroughs and innovations in the following areas

- 1 The construction of a cognitive framework driven by a both rigorous and powerful four dimensional logic abstraction induction deduction and dialectics
- 2 The establishment of a new basic conceptual system for statistics
- 3 The proposal of self weighting and convex self weighted mean or simplified to \bar{C} algorithms for continuous variables without distinguishing normal and skewed thereby achieving expectation estimate of a distribution with a centralized location in a unified framework
- 4 The development of a method for testing parameter differences independent of normalization and normality assumptions
- 5 The reconstruction of piecewise regression methods through a weighted approach that combines global modeling with a generalized trichotomy thus avoiding overfitting and enhancing model interpretability and generalizability

The central theme of the book is clear philosophical thinking is not only the foundational source of statistics but also the key force driving its methodological innovation and paradigm shift The above five aspects with ground breaking breakthroughs developed in this book is heralding a new era in statistical science To assist readers in understanding and applying the proposed ideas and algorithms the author provides essential SAS code in the appendix allowing readers to test the statistical performance of the methods
