

Section 10

DESCRIPTION, OPERATION, AND SPECIFICATIONS

Group 5

DESCRIPTION

The John Deere "T20" Series Tractor is a general-purpose tractor with sufficient power to pull five 14-inch plow bottoms on the equivalent under most soil conditions. The tractor has six forward speeds and one reverse speed.

The features of the tractor are described briefly in the paragraphs which follow. Full descriptions of each of the components or assemblies are contained in the various Sections throughout this Manual.

Serial Numbers

Each tractor bears a serial number located on the right side of the main cast part in front of the pulley (Figure 10-5-1).

The distributor and the Power-Trol valve hous-

ing also bear serial numbers.

Engine

The tractor is powered by a two-cylinder, cast-iron-block, valve-in-head engine with a displacement of 160.5 cubic inches. Rotation is counterclockwise when viewed from the flywheel side.

The engine has aluminum alloy, sleeve-type main bearings and replaceable, precision type connecting rod bearings. All bearings and other parts of the engine are pressure lubricated by a forced-feed pressure system with a full flow oil filter. The system includes a replaceable filter element. The crankcase is ventilated by a pump located on the rear end of the fan shaft. Engine speeds are controlled by a flyweight type governor driven by the camshaft.
