**Reforming Legislatures** Peverill Squire, 2024-06-26 Winner of the 2025 Virginia Gray Book Award APSA Section 22 State Politics and Policy Legislatures are ubiquitous in the American political experience First created in Virginia in 1619 they have existed continuously ever since Indeed they were established in even the most unlikely of places notably in sparsely populated frontier settlements and functioned as the focal point of every governing system devised Despite the ubiquity of state legislatures we know remarkably little about how Americans have viewed them as organizations in terms of their structures rules and procedures But with the rise of modern public opinion surveys in the twentieth century we now have extensive data on how Americans have gauged legislative performance throughout the many years That said the responses to the questions pollsters typically pose reflect partisanship policy and personality Generally respondents respond favorably to legislatures controlled by their own political party and those in power during good economic times Incumbent lawmakers get ratings boosts from having personalities home styles that mesh with those of their constituents These relationships are important indicators of people's thoughts regarding the current performance of their legislatures and legislators but they tell us nothing about attitudes toward the institution and its organizational characteristics This study offers a unique perspective on what American voters have historically thought about legislatures as organizations and legislators as representatives Rather than focusing on responses to surveys that ask respondents how they rate the current performance of lawmakers and legislatures this study leverages the most significant difference between national and state politics the existence of ballot propositions in the latter At the national level Americans have never had any say over Congress's structure rules or procedures In contrast at the state level they have had ample opportunities over the course of more than two centuries to shape their state legislatures The data examined here look at how people have voted on more than 1 500 state ballot propositions targeting a wide array of legislative organizational and parliamentary features By linking the votes on these measures with the public debates preceding them this study documents not only how Americans viewed various aspects of their legislatures but also whether their opinions held constant or shifted over time The findings reported paint a more nuanced picture of Americans attitudes toward legislatures than the prevailing one derived from survey research When presented with legislative reform measures on which concrete choices were offered and decisions on them had to be made the analyses presented here reveal that counter to the conventional wisdom that people loved their representatives but hated the legislature voters usually took charitable positions toward the institution while harboring skeptical attitudes about lawmakers motives and behaviors

**The Cinema of Francesco Rosi** Gaetana Marrone, 2020 Francesco Rosi is one of the great realist artists of post war Italian indeed post war world cinema In this book author Gaetana Marrone explores the rich visual language in which the Neapolitan filmmaker expresses the cultural icons that constitute his style and images Over the years Rosi has offered us films that trace an intricate path between the real and the

fictive the factual and the imagined His films show an extraordinarily consistent formal balance while representing historical events as social emblems that examine shape and reflect the national self They rely on a labyrinthine narrative structure in which the sense of an enigma replaces the unidirectional path leading ineluctably to a designated end and solution Rosi's logical investigations are conducted by an omniscient eye and translated into a cinematic approach that embraces the details of material reality with the panoramic perspective of a dispassionate observer This book offers intertextual analyses within such fields as history politics literature and photography along with production information gleaned from Rosi's personal archives and interviews It examines Rosi's creative use of film as document and as spectacle It is also a study of the specific cinematic techniques that characterize Rosi's work and that visually compositionally express his vision of history and the elusive truth of past and present social and political realities

#### **Constitutional Reform in Britain and France**

Elizabeth Gibson-Morgan, 2017-09-15 Any attempt at comparing contemporary change in the UK and France is a bold one since it means discussing two very different countries with strong distinctive constitutional identities This book places its emphasis on the shared historical political and cultural background of the UK and France before focusing on the sweeping transformation of their constitutional frameworks in the past quarter of a century at a national and regional level with a particular emphasis on Wales and Scotland which culminated in the June 2016 referendum on Britain's EU membership Instead of examining each country separately however as is traditional this study breaks new ground by explaining the pattern of institutional development in Britain and France from a comparative Franco-British perspective It explores the complexities of recent constitutional change in both countries in an original and comprehensive way and gives both British and French readers a deeper understanding of the two countries that have some much in common even though Brexit could drive them apart

#### *OLAF at the Crossroads* Constantin Stefanou, Simone

White, Helen Xanthaki, 2011-08-31 The authors offer many insights into the regulatory operational and institutional opportunities and challenges for OLAF the European Commission's Anti-Fraud Office Since OLAF was set up in 1999 significant changes in its functional environment have taken place including in EU criminal law and especially in mutual assistance and substantive criminal law the reconstruction of Eurojust and Europol through recent Regulations and Memoranda of Cooperation and the entry into force of the Lisbon Treaty The authors advance the view that OLAF's current legal framework must address these issues adequately The approach they take is multi-disciplinary OLAF is examined here through the prisms of EU politics and national European and to some extent comparative law focusing not only on the identification of current problems in regulation and procedure but also on its positioning within the context of European integration Operational issues are then extensively discussed making this a book for practitioners as well as policy makers

and academics The book addresses the theoretical and practical aspects of anti fraud actions within both criminal and civil aspects of public law Although OLAF works within an incomplete EU legal framework and with varying cooperation by national authorities its staff have devised mechanisms that address some of these issues Nevertheless rules covering procedural and operational issues will need to be safeguarded within future legislation VAT Neutrality Charlène Adline Herbain, 2015-05-04 Most major economies use a value added tax VAT which is a derivation of the French 1954 *taxe sur la valeur ajoutée* The initial imposition of VAT in France and its spread around the world have been driven by economic reasons This book focuses on one of these economic triggers the neutrality of VAT as regards the functioning of the economy It demonstrates that the reason VAT was chosen in France and why thereafter it spread around the world was because it offered the possibility to collect governmental revenue while allowing the economic forces of the market to interplay without being adversely affected The prerequisite conditions for the existence of VAT neutrality are therefore identified herein along with an overview of the VAT mechanism demonstrating that the concept of neutrality is built into the VAT system in a manner that allows for the preservation of the natural functioning of the market After the definition of VAT neutrality is set forth the elements that comprise VAT neutrality are tested against the realities on the ground and the issues that infringe the neutrality of VAT are identified and analysed In conclusion remedies for these issues are being sought by a review of the causes of infringement of VAT neutrality in the perspective of selected proposals for modified VAT systems These proposals include redesignating the place where VAT is levied and improving VAT collection Ultimately the proposed solution has recourse to the roots of VAT together with the most advanced technological tools available to give back to VAT the power to levy revenue while letting the economic forces of the market interplay without instigating any adverse influence

*Territorialization of Education* Pierre Champollion, 2020-07-16 This comprehensive scientific work embraces within the generic theme of education territorialities and territories the vast majority of different facets of the complex relationships between education and territories that have developed over time It sheds an original light on the many and for some new interactions between territories territories on the one hand and education on the other hand which have recently been identified and analyzed Beyond this main objective it contributes to improving the fine and differentiated understanding of the concept of territory in the sciences of education and training and more importantly it brings innovative developments to the still embryonic theorization of the complex relations between education and territories territorialities This book shows in particular through its surveys its analyses and its results that within all the multiple influences attributed to the different dimensions of the territories the very discrete territoriality falling within the symbolic territory is perhaps finally the most important territorial vector in terms of education in certain areas rural Montagnards for example particularly as regards educational and vocational guidance but not only Lastly it is not uninteresting to note that the theme it bears is spreading more and more today beyond scientific circles the problem of inequalities in education and orientation of territorial origin is

fueling recently the controversies and the reflections of the French educational policy which is thus sometimes echoed in declarative terms essentially for the moment scientific advances in this area      Bridging Sonic Borders Sharina Maíllo-Pozo,2025 In Bridging Sonic Borders Sharina Maíllo Pozo focuses on the intersections between Dominican Caribbean Afro diasporic and U S American popular music genres hip hop African American jazz blues pop and rock different types of merengue and literature by authors from different generations who write within the Dominican Republic and the many diasporic spaces of New York in Spanish English and Dominicanish a mixture of English and Dominican Spanish She dubs novels such as *La guaracha del Macho Camacho* by Luis Rafael Sánchez 1976 as the beginning of a subgenre of sonic literary texts that broke away from a long literary tradition in the Dominican Republic under the dictatorship of Rafael Trujillo that valorized Hispanophilia heteronormativity and nation building In this study she examines how migrations and these cultural interactions re imagine identity with music as a space to think about sound and the uses and absence at times of it The use and description of music in literature of the Spanish speaking Caribbean and the Dominican Republic in particular from the 1970s onwards deeply shaped new aesthetics and self expression and it developed a new interest in publishing Caribbean authors in the U S For Maíllo Pozo music in these texts becomes a way of exploring memory and nostalgia and a way of situating people in specific spaces while also drawing on a longing for home after immigration These novels and memoirs were also a place to re center people who are often invisible the working class those of African descent rural and queer people She moves on to consider literary work in the 1990s and early 2000s that focused on figures such as the iconic rock musician Luis Terror Dias life and music as a way of thinking about the in between identity of being both Dominican and a New Yorker Memoir and fictional writing by Afro Dominican New York Latinas are also a way to explore how the early foundational years of hip hop in New York were a place of freedom and invention while not ignoring the fact that it could also be a place of racialized disenfranchisement for people from many different parts of the Dominican diaspora in the city      Games of No Chance 4 Richard J. Nowakowski,2015-04-16 Combinatorial games are the strategy games that people like to play for example chess Hex and Go They differ from economic games in that there are two players who play alternately with no hidden cards and no dice These games have a mathematical structure that allows players to analyse them in the abstract Games of No Chance 4 contains the first comprehensive explorations of misère last player to move loses games extends the theory for some classes of normal play last player to move wins games and extends the analysis for some specific games It includes a tutorial for the very successful approach to analysing misère impartial games and the first attempt at using it for misère partisan games Hex and Go are featured as well as new games Toppling Dominoes and Maze Updated versions of Unsolved Problems in Combinatorial Game Theory and the Combinatorial Games Bibliography complete the volume      Global Financial Regulation Howard Davies,David Green,2013-05-08 As international financial markets have become more complex so has the regulatory system which oversees them The Basel Committee is just one of a plethora of

international bodies and groupings which now set standards for financial activity around the world in the interests of protecting savers and investors and maintaining financial stability These groupings and their decisions have a major impact on markets in developed and developing countries and on competition between financial firms Yet their workings are shrouded in mystery and their legitimacy is uncertain Here for the first time two men who have worked within the system describe its origins and development in clear and accessible terms Howard Davies was the first Chairman of the UK's Financial Services Authority the single regulator for the whole of Britain's financial sector David Green was Head of International Policy at the FSA after spending thirty years in the Bank of England and has been closely associated with the development of the current European regulatory arrangements Now with a revised and updated introduction which catalogues the changes made since the credit crisis erupted this guide to the international system will be invaluable for regulators financial market practitioners and for students of the global financial system wherever they are located The book shows how the system has been challenged by new financial instruments and by new types of institutions such as hedge funds and private equity Furthermore the growth in importance of major developing countries who were excluded for far too long from the key decision making for a has led to a major overhaul The guide is essential reading for all those interested in the development of financial markets and the way they are regulated The revised version is only available in paperback

indeed a Holy Grail or just another wrong turn in the continuing pursuit of just and effective means of protecting the rights of citizens and businesses It presents both positive and critical perspectives supplemented by case studies on the latest collectivization trends in Europe s national civil justice systems The book also shares the experiences of some non European jurisdictions that have developed promising hybrid forms of collective redress such as Canada Brazil China and South Africa In closing a selection of topical international cases that raise interesting issues regarding the effectiveness of class actions in an international context are studied and discussed
