

The Retrograde Motion of Mars

(1) On what days does Mars start and end its retrograde motion? (First Opposition)

Starts early March

Ends early October

(2) On what days does Mars start and end its retrograde motion? (Second Opposition)

December 23rd

March 18th

(3) Explain why Mars appears to undergo retrograde motion.

Whenever Earth catches up to Mars, with Earth being closer to the Sun than Mars, we see Mars in the opposite, or it looks as if Earth is overtaking Mars. This causes the retrograde motion.

(4) Explain why we see Mars about once every 2 years, whereas we see Jupiter

The Jovian planets are much further away, and their orbits take longer, so the retrogrades would be harder to readily see.
