

Conflicts Between Ethics and the Law in Healthcare

✓ Exclusively available on IvyPanda

Introduction

It is not unusual to come across a scenario where laws conflict with ethical values. This is often pronounced on disciplines that study standards of conduct, such as philosophy, theology, law psychology, or sociology, Resnik (2011). To understand the major conflicts that may arise between law and ethics, a clear definition of the two terms is of great importance. Resnik further defines ethics as “norms for conduct that distinguish between acceptable and unacceptable behavior”.

In relation to disciplinary studies, Resnik further asserts that ethics can be defined as “a method, procedure, or perspective for deciding how to act and for analyzing complex problems and issues”. On the other hand, law can be defined as a set of rules that guide man’s conduct in a society and are enforceable through public agencies (Gates, n.d., para. 2).

The underlying phrase in ethics and law is thus ‘acceptability by the populace’. The two are thus an expression of norms or rules in a society, either defined or expressive. Laws and ethics are the guiding principles of people’s behavior and ways of life in a society. They are often adhered to because they are either perceived to be right or in the course of one’s endeavor to seek approval from others. However, when the rules are too serious, that is, enacted through a judicial mechanism, the enforcer and custodian become the government. In this case, a mere approval/disapproval is not satisfactory.

Ethics vs. the Law: A General View

First, it is imperative to note that the conflicts that often arise between law and ethics are experienced in many disciplines and professions. The focus and study should be widespread and not confined to bio-medical studies only.
