

Laboratory Manual for Introductory Geology

ALLAN LUDMAN | STEPHEN MARSHAK

3e

An active-learning approach that engages students

Written from the ground up using an inquiry-based approach, this manual features hands-on, discovery-based exercises that help students gain an intuitive understanding of geology.

What Do You Think Mini Cases

Each chapter now contains a special "What Do You Think" scenario where students are asked to make a decision, offer a recommendation, or to express their opinion. These exercises are designed to spark discussion, to help students see the connection between geology and the "real" world, and to connect geology with other disciplines such as business, ethics, and history.

A stunning art program for visual learners

The Third Edition features an improved art program with larger and more detailed figures, often with a 3D-perspective. In addition, every map in the book has been custom made exclusively for the Third Edition in order to bring more clarity and connection to each exercise.

New **FREE** Coursepack

 Many instructors face the challenges of students not being prepared for a lab, or of having to administer the course in a distance- or blended-learning environment. Norton's new and **FREE** coursepack features auto-grade prelab exercises, on-line versions of selected exercises, and streaming animations and videos to help you best serve your students both in the lab or from afar.

All Available at a Great Price

Allan Ludman and Stephen Marshak's *Laboratory Manual for Introductory Geology* offers low prices, including discounted three-hole punch and electronic versions. And even better prices are available if you choose to bundle this text with either Stephen Marshak's *Earth: Portrait of a Planet*, or *Essentials of Geology*.
