Bale Management:

It is the process of judicious selection of bales in order to achieve consistent level of quality with minimum level of price.

It is done to attain the following objectives:

1. To achieve a minimum level of cost by combining raw cotton lots of different prices.
2. To achieve a consistent level of quality by selecting bales for each laydown in such a way that the average fiber properties always stay within an acceptable range.

In factories, bale management is carried out in two ways.
