

SECTION A

Section - A consists of Multiple Choice type questions of 1 mark each.

1. The ratio of *HCF* to *LCM* of the least composite number and the least prime number is :

- (a) 1:2
- (b) 2: 1
- (c) 1: 1
- (d) 1: 3

Answer: (a)

Explanation:

The least composite number is 4, which has prime factors 2 and 2. The least prime number is 2.

The HCF (Highest Common Factor) of 4 and 2 is 2, because that is the largest number that divides both 4 and 2.

The LCM (Least Common Multiple) of 4 and 2 is 4, because that is the smallest number that is a multiple of both 4 and 2.

Therefore, the ratio of HCF to LCM of 4 and 2 is 2:4 or 1:2.

So the answer is (a) 1:2.

2. The roots of the equation $x^2 + 3x - 10 = 0$ are :

- (a) 2, - 5
- (b) - 2, 5
- (c) 2, 5
- (d) - 2, - 5

Answer: (a)

Explanation:

Given, $x^2 + 3x - 10 = 0$

$$x^2 + 5x - 2x - 10 = 0$$

$$x(x + 5) - 2(x + 5) = 0$$

$$(x + 5)(x - 2) = 0$$

$x = 2, - 5$ are the roots of the given equation.

Religious Schools in Europe Marcel Maussen, Floris Vermeulen, Michael Merry, Veit Bader, 2017-10-02 The European Convention on Human Rights guarantees freedom of education including the opportunities to create and operate faith based schools However as European societies become more religiously diverse and less religious at the same time the role of faith based schools is increasingly being contested Serious tensions have emerged between those who ardently support religious schools in their various forms and those who oppose them Given that faith based schools enjoy basic constitutional guarantees in Europe the controversy around them often surrounds issues of public financing degrees of organisational and pedagogical autonomy and educational practices and management This volume is about the controversies surrounding religious schools in a number of Western European countries The introductory chapter briefly analyses the structural pressures that affect the position of religious schools outlining the relevant institutional arrangements in countries such as Denmark Germany France Ireland the Netherlands and Scotland The following chapters provide a detailed analysis of the discussions and controversies surrounding faith based schools in each country Finally the two concluding chapters aim to provide a bigger comparative picture with regard to these debates about religious education in liberal democratic states and culturally pluralist societies This book was originally published as a special issue of Comparative Education

Manufacturing the Mathematical Child Anna Llewellyn, 2018-05-15 Mathematics is a subject held in high esteem around the world yet the teaching and learning of mathematics is rarely viewed as good enough and many find the subject difficult to comprehend or engage with In *Manufacturing the Mathematical Child* Anna Llewellyn asks some difficult questions in order to determine why this is the case and to question who it is that we allow to succeed at mathematics particularly within the context of neoliberalism where education is a product of the market By looking at the various sites of production Llewellyn examines the ways that key discursive spaces produce very different expectations of what it means to do mathematics and demonstrates that these place various homogenised expectations upon children Arguing that these are not natural but instead a reproduction of discursive norms the book demonstrates why some people fit these standardized ways of being and others do not Using England as a case study and referring to other international contexts Llewellyn argues that there is a functionality found within certain educational policy discourses and a romantic attachment to the natural child found within educational research neither of which can match what happens in the messy classroom As a result it becomes evident that exclusion from mathematics is inevitable for many children Original and exciting this book will be of great interest to academics researchers and postgraduate students within the fields of mathematics education childhood studies policy studies and Foucauldian or post structural analysis

Non-Linear Perspectives on Teacher Development Kathryn J. Strom, Tammy Mills, Linda Abrams, 2023-03-21 Despite the multifaceted complexity of teaching dominant perspectives conceptualize teacher development in linear dualistic transactional human centric ways The authors in this book offer non linear alternatives by drawing on a continuum of complex perspectives including CHAT complexity theory actor network theory indigenous studies rhizomatics and posthuman neomaterialisms The chapters included here illuminate how different ways of thinking can help us better examine how teachers learn relationally with human material and discursive elements and offer ways to understand the entangled nature of the relationship between that learning and what emerges in classroom instructional practice They also present situated illustrations of what those entanglements or assemblages look like in the preservice induction and inservice phases from early childhood to secondary settings and across multiple continents Authors

provide evidence that research on teacher development should focus on process as much if not more than product and show that complexity perspectives can support forward thinking assets based pedagogies Methodologically the chapters encourage conceptual creativity and expansion and support an argument for blurring theory method and normalising methodological hybridity Ultimately this book provides conceptual theoretical and methodological tools to understand current educational conditions in late capitalism and imagine otherwise It was originally published as a special issue of the journal Professional Development in Education
