People - Marine Mammal Interactions Andrew Butterworth, Mark P. Simmonds, 2017-08-15 Our relationships with marine mammals are complex We have used them as resources and in some places this remains the case viewed them as competitors and culled them again ongoing in some localities been so captivated and intrigued by them that we have taken them into captivity for our entertainment and developed a lucrative eco tourism activity focused on them in many nations When we first envisaged this special topic we had two overarching aims Firstly we hoped to generate critical evaluation of some of our relationships with these animals Secondly we hoped to attract knowledgeable commentators and experts who might not traditionally publish in the peer reviewed literature We were also asking ourselves a question about what responsibility mankind might have to marine mammals on our rapidly changing planet The answer to the question can or should humans have responsibility for the lives of marine mammals when they are affected by our activities is in our opinion yes and the logical progression from this question is to direct research and effort to understand and optimise the actions reactions and responses that mankind may be able to take We hope that the papers in this special issue bring some illumination to a small selection of topics under this much wider topic area and prove to be informative and stimulating

Startup Capitalism Robyn Klingler-Vidra, Ramon Pacheco Pardo, 2025-04-15 In *Startup Capitalism* Robyn Klingler Vidra and Ramon Pacheco Pardo explore the place of startups in contemporary East Asian economies The last few decades have seen East Asian governments provide increasing support for startups new high growth technologically oriented firms Yet as

the authors observe such initiatives do not necessarily benefit the growth of startups as challengers to large established firms Rather they often enable startups to function as boosters for the competitiveness of these firms Startups in short are both disruptors to and resources for big businesses Klingler Vidra and Pacheco Pardo demonstrate this dual role by examining the evolution of startup centric policies in Japan South Korea Taiwan and China They show that in the region what they call startup capitalism an economic and political system in which startups contribute to employment innovation and growth can take multiple forms Rich with empirical detail Startup Capitalism reveals how and why startups can end up working with or even for large firms to drive a country s technological capabilities

Deconstructing Money Laundering Risk Noémi També Bearpark,2022-07-14 This book examines the interpretation of the risk based approach RBA and its application across the banking industry It explores the ways conflicting risk interpretation and deconstruction of money laundering risk have unintended consequences across the banking industry Furthermore it offers a theoretical framework that can be adopted and implemented by risk practitioners to address money laundering ML risks The interpretation and application of the RBA influences the way money laundering risk is perceived presented and managed often resulting in misalignment among stakeholders Moreover AML practitioners interpret money laundering ML risk as an entity that can be contained largely in ignorance of the fact that ML risk is self referential The book therefore addresses complex inter system feedback phenomena that lead to de risking and re risking and offers a new ML risk communication framework on this basis It will be of value to researchers and also to stakeholders within financial institutions financial intelligence units and regulators in the fight against money laundering

provide a holistic view of the subjects under discussion **Handbook of Approximate Bayesian Computation** Scott A. Sisson, Yanan Fan, Mark Beaumont, 2018-09-03 As the world becomes increasingly complex so do the statistical models required to analyse the challenging problems ahead For the very first time in a single volume the Handbook of Approximate Bayesian Computation ABC presents an extensive overview of the theory practice and application of ABC methods These simple but powerful statistical techniques take Bayesian statistics beyond the need to specify overly simplified models to the setting where the model is defined only as a process that generates data This process can be arbitrarily complex to the point where standard Bayesian techniques based on working with tractable likelihood functions would not be viable ABC methods finesse the problem of model complexity within the Bayesian framework by exploiting modern computational power thereby permitting approximate Bayesian analyses of models that would otherwise be impossible to implement The Handbook of ABC provides illuminating insight into the world of Bayesian modelling for intractable models for both experts and newcomers alike It is an essential reference book for anyone interested in learning about and implementing ABC techniques to analyse complex models in the modern world
