and Challenges of Hair Analysis Pascal Kintz,Alberto Salomone,Marco Vincenti,2023-12-18 Hair analysis is a reliable and widely used tool to evaluate drug exposure in many fields including workplace testing drug abuse history and withdrawal control post mortem toxicology doping control therapeutic drug monitoring of pharmaceuticals and even environmental exposure to toxic agents Compounds incorporated into the hair structure resist hair growth and regular washing for several months leading to a potential chronological trace of exposure with farther periods corresponding to the hair segments more

distant from the hair root The relentless improvement of analytical procedures and instrumental technologies together with the continuous introduction of new psychoactive substances have led to an increasing number of studies and practical applications of hair analysis This book is a comprehensive guide to hair analysis from general concepts ideal for students and those new to the field to interpretation and advanced methods for experts working in the area With contributions from world leading scientists in each field this book describes state of the art emerging issues and recent analytical approaches to hair analysis that will serve as an essential tool to clinical and forensic toxicology laboratories across the globe

Identification of Damage Using Lamb Waves Zhongqing Su,Lin Ye,2009-09-01 Lamb waves are guided waves that propagate in thin plate or shell structures There has been a clear increase of interest in using Lamb waves for identifying structural damage entailing intensive research and development in this field over the past two decades Now on the verge of maturity for diverse engineering applications this emerging technique serves as an encouraging candidate for facilitating continuous and automated surveillance of the integrity of engineering structures in a cost effective manner In comparison with conventional nondestructive evaluation techniques such as ultrasonic scanning and radiography which have been well developed over half a century damage identification using Lamb waves is in a stage of burgeoning development presenting a number of technical challenges in application that need to be addressed and circumvented It is these two aspects that have encouraged us to write this book with the intention of consolidating the knowledge and know how in the field of Lamb wave based damage identification and of promoting widespread attention to mature application of this technique in the practical engineering sphere This book provides a comprehensive description of key facets of damage identification technique using Lamb waves based on the authors knowledge comprehension and experience ranging from fundamental theory through case studies to engineering applications

Latin American Women and Research Contributions to the IT Field Negrón, Adriana Peña Pérez,Muñoz, Mirna,2020-12-18 Although the effort to involve women in engineering has risen in recent years with the creation of new initiatives and the promotion of inclusion in technical disciplines the active participation of women in engineering professions is continuously lower than expected While the need for engineers appears to be constantly increasing women still do not fill most of this role and have a long way to go to even reach an equal split in the field This gender gap has a significant impact how women in the STEM fields are perceived as well as their experiences in their education and careers When it comes to Latin American women in IT their contribution to science can go unnoticed their participation levels in these fields are very low and they often occupy lower level positions than their male counterparts These issues need to be discussed and the experiences of women who work in the field must be shared Latin American Women and Research Contributions to the IT Field highlights the important role of Latin American women in IT by collecting and disseminating their frontier research contributions in order to provide more visibility and inspire greater participation of Latin American women within the major field of computer science With chapters contributed by female authors from eight

Latin American and Caribbean countries the book provides a deep analysis of these women's trajectory paths to high quality theoretical and applied relevant research in computer science and IT While highlighting areas such as inclusivity and STEM education along with advancements and achievements in topics that include nonverbal interaction in virtual reality fuzzy logic applications in education and ant colony optimization this book is ideal for professionals academics students and researchers working in the fields of information technologies and computer science as well as those interested in gender and women's studies
