18. Plants that live on the floor of forests tend to have much larger leaves than plants that live in hot, sunny conditions. Offer an explanation for this in which you refer to specific parts of the internal structure of a leaf.
19. Cacti are plants that live in extremely dry environments. Unlike most other plants, cacti do not have regular leaves, but instead have spines. They do have green stems. How would the lack of regular leaves help cacti survive in their environment? In what part of the cacti would photosynthesis occur?
20. Thinking about the structure and function of leaves, work with your group to propose modifications you might expect to see in the leaves of aquatic plants. Use the space below to make a sketch of the modified leaf, justifying what you include as well as what you leave out.
21. Use your knowledge of plant cell structure to answer each of the following questions:
 - a. Where might water be stored for later use in the process of photosynthesis?
 - b. What might plant cells do with the sugars made during photosynthesis?
 - c. How does having cells with walls help a leaf to absorb as much energy as possible?
