Klumpp, 2011-09-21 An Ordinary Guy spirits us along his journey from the post World War Two neighborhoods of the Bronx through his days as a cadet at the New York State University Maritime College to his thirty years at sea sailing as mate on oil tankers and captain of harbor and sea going towing vessels He allows us a peek into the the world of boats and the crews that worked them Along the way we are skillfully transported through the rich tapestry of history that saw the Vietnam Era the struggle for civil rights a resignation of a president the horror of 9 11 and the response to international terrorism The Ordinary Guy shares with us his interpretation of these events all the while entertaining us with tales that range from the informative to the outrageous We are his passengers as he takes us along on his joyous and sometimes angry romp through seventy years of the extraordinary life and times of this ordinary guy *Voices of Innovation* Edward W. Marx, 2023-07-17 Everyone talks innovation and we can all point to random examples of innovation inside of healthcare information technology but few repeatable processes exist that make innovation more routine than happenstance How do you create and sustain a culture of innovation What are the best practices you can refine and embed as part of your organization s DNA What are the potential outcomes for robust healthcare transformation when we get this innovation mystery solved Through timely essays from leading experts the first edition showcased the widely adopted healthcare innovation model from HIMSS and how providers could leverage to increase their velocity of digital transformation Regardless of its promise innovation has been slow in healthcare The second edition takes the critical lessons learned from the first edition expands and refreshes the content as a result of changes in the industry and the world For example the pandemic really shifted things Now providers are more ready and interested to innovate In the past year alone significant disruptors such as access to digital health have entered the provider space threatening the existence of many hospitals and practices This has served as a giant wake up call that healthcare has shifted And finally there is more emphasis today than before on the concept of patient and clinician experience Perhaps hastened by the pandemic the race is on for innovations that will help address clinician burnout while better engaging patients and families Loaded with numerous case studies and stories of successful innovation projects this book helps the reader understand how to leverage innovation to help fulfill the promise of healthcare information technology in enabling superior business and clinical outcomes *Voices of Innovation - Payers* Edward W. omnichannel offerings through virtual care and video or telephonic technologies and from standardized to personalized solutions In addition to healthcare providers payers are also redefining their role in care delivery through provider ownership technology and provider enablement to deliver higher value care to members While the payer community has been slow to innovate they now have an opportunity and an incentive to play an active role in reimagining the future of care delivery In the past year alone significant disruptors have entered the provider space threatening the existence of payers specifically self funded programs such as Amazon and Walmart This has served as a giant wake up call that healthcare has shifted Now more than ever there is an emphasis on the patient and clinician experience Perhaps hastened by the pandemic the race is on for innovations from the payer community to improve patient and provider engagement Unlike other players payers have ended visibility into individual care needs and utilization patterns across providers and settings This perspective can provide informed choices around optimal care models unlock value through improved health outcomes and lower the total cost of care for members and customers This book is loaded with numerous case studies and interviews with healthcare leaders from the payer community helping stakeholders understand how to leverage innovation leading them to superior business and clinical outcomes The book also discusses how and why data is key to innovation activities and how partnerships are key to using data effectively
