Geotechnical Engineering Nagaratnam Sivakugan, Braja M. Das, 2009 Geotechnical Engineering A Practical Problem Solving Approach covers all of the major geotechnical topics in the simplest possible way adopting a hands on approach with a very strong practical bias You will learn the material through worked examples that are representative of realistic field situations whereby geotechnical engineering principles are applied to solve real life problems **River dyke failure modeling under transient water conditions** Wilmer Ferney Morales Peñuela, 2015-11-26 Knowledge of the performance of river dykes during flooding is necessary when designing governmental assistance plans aimed to reduce both casualties and material damage This is especially relevant when floods have increased in their frequency during the last decades together with the resulting material damage and life costs Most of previous attempts for analyzing dyke breaching during flooding have neglected to consider the soil mechanics component and the influence of infiltration and saturation changes on the failure mechanisms developed in the river dyke This research project aimed to fill that gap in knowledge by analyzing in a comprehensive manner the effect of transient water conditions represented by successive flood cycles on the seepage conditions and subsequent breaching of dykes Therefore three key sub projects were carried out the analysis of the results from an overflow field test the physical modeling of small scaled models under an enhanced gravity field the numerical modeling of the flow response and the resulting stability of both the air and water side slopes The results from the numerical simulations matched accurately with the results obtained with the centrifuge modeling including the prediction of local instabilities during the flood cycles for those dykes that did not include a toe filter **Earthquake Engineering for Dams and Reservoirs** Jonathan Hinks, 2023-09-25 Earthquake Engineering for Dams and Reservoirs is an invaluable source for any engineer or designer tasked with building retrofitting or maintaining dams in all seismically active regions to make decisions on the type of dam structure required for new projects and understand the issues that face existing dams and how to mitigate them **Proceedings of the Indian Geotechnical Conference 2022 Volume 9** Babu T.
