Geography 2014 End Of Year Memo:

The Drone Memos Jameel Jaffer, 2010-01-12 A trenchant summation and analysis of the legal rationales behind the US drone policy of targeted killing of suspected terrorists including US citizens Publishers Weekly starred review In the long response to 9 11 the US government initiated a deeply controversial policy of targeted killing the extrajudicial execution of suspected terrorists and militants typically via drones A remarkable effort was made to legitimize this practice one that most human rights experts agree is illegal and that the United States has historically condemned In *The Drone Memos* civil rights lawyer Jameel Jaffer presents and assesses the legal memos and policy documents that enabled the Obama administration to put this program into action In a lucid and provocative introduction Jaffer who led the ACLU legal team that secured the release of many of the documents evaluates the drone memos in light of domestic and international law He connects the documents legal abstractions to the real world violence they allow and makes the case that we are trading core principles of democracy and human rights for the illusion of security A careful study of a secretive counterterrorism infrastructure capable of sustaining endless orderless war this book is profoundly necessary Katrina vanden Heuvel editor and publisher of *The Nation*

How to Run a College Brian C. Mitchell, W. Joseph King, 2018-01-15 How can colleges stay relevant in the twenty first century Residential colleges are the foundation on which US higher education is based These institutions possess storied traditions fondly cherished by students alumni and faculty There is no denying however that all colleges today struggle with changing consumer preferences high sticker prices and aging infrastructure Technological and pedagogical alternatives not to mention growing political pressure present complex challenges What can colleges and smaller universities do to stay relevant in today s educational and economic climate In their concise guide *How to Run a College* Brian C Mitchell and W Joseph King analyze how colleges operate Widely experienced as trustees administrators and faculty they understand that colleges must update their practices monetize their assets and focus on core educational strategies in order to build strong institutions Mitchell and King offer a frank yet optimistic vision for how colleges can change without losing their

fundamental strengths To survive and become sustainable they must be centers of dynamic learning as well as economic engines able to power regional state and national economies Rejecting the notion that American colleges are holdovers from a bygone time How to Run a College shows instead that they are centers of experimentation and innovation that heavily influence higher education not only in the United States but also worldwide [The Unquiet Frontier](#) Jakub J. Grygiel,A. Wess Mitchell,2017-08-15 How America s vulnerable frontier allies and American power are being targeted by rival nations From the Baltic to the South China Sea newly assertive authoritarian states sense an opportunity to resurrect old empires or build new ones at America s expense Hoping that U S decline is real nations such as Russia Iran and China are testing Washington s resolve by targeting vulnerable allies at the frontiers of American power The Unquiet Frontier explains why the United States needs a new grand strategy that uses strong frontier alliance networks to raise the costs of military aggression in the new century Jakub Grygiel and Wess Mitchell describe the aggressive methods rival nations are using to test U S power in strategically critical regions throughout the world They show how rising and revisionist powers are putting pressure on our frontier allies countries like Poland Israel and Taiwan to gauge our leaders commitment to upholding the U S led global order To cope with these dangerous dynamics nervous U S allies are diversifying their national security menu cards by beefing up their militaries or even aligning with their aggressors Grygiel and Mitchell reveal how numerous would be great powers use an arsenal of asymmetric techniques to probe and sift American strength across several regions simultaneously and how rivals and allies alike are learning from America s management of increasingly interlinked global crises to hone effective strategies of their own The Unquiet Frontier demonstrates why the United States must strengthen the international order that has provided greater benefits to the world than any in history **Conflicts in History Education in Europe** Ander Delgado,Andrew Mycock,2023-07-01 The heightened resonance of identity driven politics in many states across twenty first century Europe emphasizes the critical role of history in shaping public contestation of the idea of the nation and accordant manifestations of nationalism and national identity How the past is interpreted or what and how is remembered has proven increasingly febrile contentious and divisive Debates about history have gone beyond academia and have permeated and polarised politics and society in many European countries Intense debate and dispute about national history and culture has often focused on the history teaching in schools colleges and universities According to the aforementioned it is evident that the teaching of history in the classroom is a relevant topic within the educational system For this reason it is not surprising that many times the choice of what kind of history to teach becomes a controversial topic The existence in a given society of different visions about the nation or the various responses proposed to face the social challenges existing in it immigration independence nationalisms can turn the teaching of history into a debated and controversial topic Logically depending on the specific political context of each country this debate can acquire different developments and characteristics The school is not an institution isolated from its socio political context In fact both areas constantly interact Therefore this

book proposes an approach to this topic that tries to connect the specific political context of different countries with the debates about education and history teaching from 1990 until the present. It deals with the extent to which the social and political context affects the history teaching practice developed in the classrooms through the decisions made on the official curricula and textbooks. Emphasizing this connection between both aspects is one of the strengths of this book. That is the reason why this book proposes an approach to that reality from diverse points of view and show the different materializations observed in this area in the studied cases. The chapters of this volume allow us to verify this heterogeneous reality and help enrich our knowledge on this broad and interesting topic.

The Inequality Paradox Douglas McWilliams, 2018-10-09 In his illuminating new book Douglas McWilliams argues that inequality is largely driven not by a conspiracy of the rich as Thomas Piketty suggests but by technology and globalization that have led to the paradox of rising inequality even as worldwide poverty drops. But what are the implications of this seeming contradiction and what ultimately drives the global distribution of wealth? What can societies do to reshape capitalism for the 21st century? Drawing on the latest research, McWilliams investigates how wealth is concentrated and why it persistently remains in the hands of very few. In accessible and thought provoking prose, McWilliams poses a comprehensive theory on why capitalism has not met its match in the form of increasingly disparate income distribution but warns of the coming wave of technological development, the fourth industrial revolution, that threatens to create a scarcity of unskilled jobs that will lead to even greater inequality and explains what governments can do to prepare for this. From the inquisitive layperson to the professional economist or policymaker, *The Inequality Paradox* is essential reading for understanding the global economy in its present state. McWilliams is a fresh authoritative voice entering the global discussion, making this book indispensable in preparing for the imminent economic challenges of our changing world.

Homeless Advocacy and the Rhetorical Construction of the Civic Home Melanie Loehwing, 2018-10-30 Homeless assistance has frequently adhered to the three hots and a cot model which prioritizes immediate material needs but may fail to address the political and social exclusion of people experiencing homelessness. In this study, Loehwing reconsiders typical characterizations of homelessness, citizenship, and democratic community through unconventional approaches to homeless advocacy and assistance. While conventional homeless advocacy rhetoric establishes the urgency of homeless suffering, it also implicitly invites housed publics to understand homelessness as a state of abnormality that destines the individuals suffering it to life outside the civic body. In contrast, Loehwing focuses on atypical models of homeless advocacy: the meal sharing initiatives of Food Not Bombs, the international competition of the Homeless World Cup, and the annual Homeless Persons Memorial Day campaign. She argues that these modes of unconventional homeless advocacy provide rhetorical exemplars of a type of inclusive and empowering civic discourse that is missing from conventional homeless advocacy and may be indispensable for overcoming homeless marginalization and exclusion in contemporary democratic culture. Loehwing's interrogation of homeless advocacy rhetorics demonstrates how discursive

practices shape democratic culture and how they may provide a potential civic remedy to the harms of disenfranchisement discrimination and displacement This book will be welcomed by scholars whose work focuses on the intersections of democratic theory and rhetorical and civic studies as well as by homelessness advocacy groups *What the Flick? Religion in the Primary School Peter Hemming,2015-02-20 Religion and its relationship to schooling is an issue that has become more and more topical in recent years In many countries developments such as the diversification of state school sectors concerns about social cohesion between ethnic and religious groups and debates about national identity and values have raised old and new questions about the role of religion in education Whilst the significance of this issue has been reflected in renewed interest from the academic community much of this work has continued to be based around theoretical or pedagogical debates and stances rather than evidence based empirical research This book aims to address this gap by exploring the social and political role of religion in the context of the primary school Drawing on original ethnographic research with a child centred orientation comparisons are drawn between Community and Roman Catholic primary schools situated within a multi faith urban area in the UK In doing so the study explores a number of ways in which religion has the potential to contribute to everyday school life including through school ethos and values inter pupil relations community cohesion and social identity and difference At the centre of the analysis are two key sociological debates about the significance of religion in late modern societies The first is concerned with the place of religion in public life and the influence of secularisation and post secularism on the relationship between religion and schooling The second relates to the increasingly multi faith nature of many national populations and the implications for religious citizenship in educational settings Religion in the Primary School will be a useful resource for academics researchers and students as a key addition to existing knowledge in the disciplines of education sociology and human geography It will also be of value to both policy makers and educationalists interested in the role of religion in schools and the implications for the wider community and society in a range of national contexts

News for the Rich, White, and Blue Nik Usher,2021-07-06 As cash strapped metropolitan newspapers struggle to maintain their traditional influence and quality reporting large national and international outlets have pivoted to serving readers who can and will choose to pay for news skewing coverage toward a wealthy white and liberal audience Amid rampant inequality and distrust media outlets have become more out of touch with the democracy they purport to serve How did journalism end up in such a predicament and what are the prospects for

achieving a more equitable future In *News for the Rich White and Blue* Nikki Usher recasts the challenges facing journalism in terms of place power and inequality Drawing on more than a decade of field research she illuminates how journalists decide what becomes news and how news organizations strategize about the future Usher shows how newsrooms remain places of power largely white institutions growing more elite as journalists confront a shrinking job market She details how Google Facebook and the digital advertising ecosystem have wreaked havoc on the economic model for quality journalism leaving local news to suffer Usher also highlights how the handful of likely survivors well funded media outlets such as the New York Times increasingly appeal to a global placeless reader *News for the Rich White and Blue* concludes with a series of provocative recommendations to reimagine journalism to ensure its resiliency and its ability to speak to a diverse set of issues and readers

Sounding the Limits of Life Stefan Helmreich, 2015-10-27 What is life What is water What is sound In *Sounding the Limits of Life* anthropologist Stefan Helmreich investigates how contemporary scientists biologists oceanographers and audio engineers are redefining these crucial concepts Life water and sound are phenomena at once empirical and abstract material and formal scientific and social In the age of synthetic biology rising sea levels and new technologies of listening these phenomena stretch toward their conceptual snapping points breaching the boundaries

between the natural cultural and virtual Through examinations of the computational life sciences marine biology astrobiology acoustics and more Helmreich follows scientists to the limits of these categories Along the way he offers critical accounts of such other than human entities as digital life forms microbes coral reefs whales seawater extraterrestrials tsunamis seashells and bionic cochlea He develops a new notion of sounding as investigating fathoming listening to describe the form of inquiry appropriate for tracking meanings and practices of the biological aquatic and sonic in a time of global change and climate crisis Sounding the Limits of Life shows that life water and sound no longer mean what they once did and that what count as their essential natures are under dynamic revision *Temple of Peace* Ingo Trauschweizer, 2021-03-19 This collection raises timely questions about peace and stability as it interrogates the past and present status of international relations The post World War II liberal international order upheld by organizations such as the United Nations the North Atlantic Treaty Organization and similar alliances aspired to ensure decades of collective security economic stability and the rule of law All of this was a negotiated process that required compromise and yet it did not make for a peaceful world When Winston Churchill referred to the UN framework as the temple of peace in his famous 1946 Iron Curtain speech he maintained that international alliances could help provide necessary stability so free people could prosper both economically and politically Though the pillars of international order remain in place today in a world defined as much by populism as protest leaders in the United States no longer seem inclined to serve as the indispensable power in an alliance framework that is built on shared values human rights and an admixture of hard and soft power In this book nine scholars and practitioners of diplomacy explore both the successes and the flaws of international cooperation over the past seventy years Collectively the authors seek to address questions about how the liberal international order was built and what challenges it has faced as well as to offer perspectives on what could be lost in a post American world The Reproach of Hunger David Rieff, 2015-10-06 In 2000 the world's leaders and experts agreed that the eradication of hunger was the essential task for the new millennium Yet in the last decade the price of wheat soya and rice have spiraled seen by many as the cause of widening poverty gap and political unrest from the Arab Spring to Latin America This food crisis has condemned the bottom billion of the world's population who live on less than 1 a day to a state of constant hunger In *The Reproach of Hunger* leading expert on humanitarian aid and development David Rieff goes in search of the causes of this food security crisis as well as the failures to respond to the disaster In addition to the failures to address climate change poor governance and misguided optimism Rieff cautions against the increased privatization of aid with such organization as the Gates Foundation spending more than the WHO on food relief The invention of the celebrity campaigner from Bono to Jeffrey Sachs whose business led solutions have robbed development of its political urgency The hope that the crisis of food scarcity of food production can be solved by a technological innovation In response Rieff demands that we rethink the fundamental causes of the world's grotesque inequalities and see the issue as a political challenge we are all failing to confront The Future of Dark Tourism Philip R.

Stone, Daniel W.M. Wright, 2024-09-10 This book offers critical scenarios of dark tourism futures and examines how our significant dead will be remembered in future visitor economies It aims to inspire critical thinking by probing the past disrupting the present and provoking the future The volume outlines key features of difficult heritage and future cultural trauma and highlights the role of technology immersive visitor experiences and the thanatological condition of future dark tourism The book provides a collection of informed observations of how future societies might recall their memorable dead and how the noteworthy dead might be re created and retained through dark tourism The book forecasts a dark tourism future that is not only perilous but also full of possibilities It is a helpful resource for students and researchers in tourism heritage futurology sociology human geography and cultural studies *A University Education* David Willetts, 2017-11-17 Universities have a crucial role in the modern world In England entrance to universities is by nation wide competition which means English universities have an exceptional influence on schools a striking theme of the book This important book first investigates the university as an institution and then tracks the individual on their journey to and through university In *A University Education* David Willetts presents a compelling case for the ongoing importance of the university both as one of the great institutions of modern society and as a transformational experience for the individual The book also makes illuminating comparisons with higher education in other countries especially the US and Germany Drawing on his experience as UK Minister for Universities and Science from 2010 to 2014 the author offers a powerful account of the value of higher education and the case for more expansion He covers controversial issues in which he was involved from access for disadvantaged students to the introduction of 9 000 fees The final section addresses some of the big questions for the future such as the the relationship between universities and business especially in promoting innovation He argues that the two great contemporary trends of globalisation and technological innovation will both change the university significantly This is an authoritative account of English universities setting them for the first time in their new legal and regulatory framework
