## **Geography Controlled Test March 2015:**

**Advances in the Evolutionary Ecology of Termites** Alberto Arab, Solange Del Carmen Issa Ponce, Daniel Aguilera-Olivares, 2023-08-16 Termites are eusocial insects that live in colonies composed of hundreds to millions of individuals. Their colonies are mainly organized into reproductive and non-reproductive castes which have specific tasks such as nest construction, foraging, reproduction, brood care, and colony defense. The evolution of the symbiotic association between termites and microorganisms allows them to decompose ingested lignocellulose from plant substrates such as wood, including herbivore dung and soil humus, making them important insect decomposers that play a crucial role in ecosystem functioning by contributing to litter decomposition, soil formation, and nutrient cycling. On the other hand, termites have recently been classified as eusocial cockroaches, which have gained increasing attention in evolutionary studies to understand the transition to eusociality from subsocial wood roaches. This current growing interest in termite research calls for a collection dedicated to these fascinating insects.

***Reframing Climate Change*** Shannon O'Lear, Simon Dalby, 2015-07-24 Change the system, not the climate, is a common slogan of climate change activists. Yet when this idea comes into the academic and policy realm, it is easy to see how climate change discourse frequently asks the wrong questions. *Reframing Climate Change* encourages social scientists, policy makers, and graduate students to critically consider how climate change is framed in scientific, social, and political spheres. It proposes ecological geopolitics as a framework for understanding the extent to which climate change is a meaningful analytical focus, as well as the ways in which it can be detrimental. Detracting attention from more productive lines of thought, research, and action, the volume draws from multiple perspectives and disciplines to cover a broad scope of climate change. Chapter topics range from climate science and security to climate justice and literacy. Although these familiar concepts are widely used by scholars and policy makers, they are discussed here as frequently problematic when used as lenses through which to study climate change. Beyond merely reviewing current trends within these different approaches to climate change, the collection offers a thoughtful assessment of these approaches with an eye towards an overarching reconsideration of the current understanding of our relationship to climate change. *Reframing Climate Change* is an essential resource for students, policy makers, and anyone interested in understanding more about this important topic. Who decides what the priorities are? Who benefits from these priorities, and what kinds of systems or actions are justified or hindered? The key contribution of the book is the outlining of ecological geopolitics as a different way of understanding human-environment relationships, including and beyond climate change issues.

*In Sickness and in Wealth* Carol Chan, 2018-08-10 Villagers in Indonesia hear a steady stream of stories about the injuries abuses and even deaths suffered by those who migrate in search of work So why do hundreds of thousands of Indonesian workers continue to migrate every year Carol Chan explores this question from the

perspective of the origin community and provides a fascinating look at how gender faith and shame shape these decisions to migrate Villagers evaluate men s and women s migrations differently leading to different ideas about which kinds of human or financial flows should be encouraged and which should be discouraged or even criminalized Despite routine and well documented instances of exploitation of Indonesian migrant workers some villagers still emphasize that a migrant s success or failure ultimately depends on that individual s morality fate and destiny Indonesian villagers construct strategies for avoiding migration related risks that are closely linked to faith and belief in supernatural agency These strategies shape the flow of migration from the country and help to ensure the continued confidence Indonesian people have in migration as an act of promise and hope

Brexit Geographies Mark Boyle,Ronan Paddison,Peter Shirlow,2020-06-29 This comprehensive volume explores the political social economic and geographical implications of Brexit within the context of an already divided UK state It demonstrates how support for Brexit not only sharpened differences within England and between the separate nations comprising the UK state but also reflected how austerity politics against which the referendum was conducted impacted differently with north and south urban and rural becoming embroiled in the Leave vote This book explores how as the process of negotiating the secession of the UK from the EU was to demonstrate the seemingly intractable problem of the Irish border and the need to maintain a soft border provided a continuing obstacle to a smooth transition The authors in this book also explore various other profound questions that have been raised by Brexit questions of citizenship of belonging of the probable impacts of Brexit for key economic sectors including agriculture and its meaning for gender politics The book also brings to the forefront how the UK was geographically imagined a new lexicon of left behind places citizens of somewhere and citizens of nowhere conjuring up new imaginations of the spaces and places making up the UK This book draws out the wider implications of Brexit for a refashioned geography It was originally published as a special issue of the journal Space and Polity
