## **Geography Final Paper 2013 Grade 11 November:**

*Planning and Design for Sustainable Urban Mobility* Un-Habitat, 2013-10-30 Urban transport systems worldwide are faced by a multitude of challenges Among the most visible of these are the traffic gridlocks experienced on city roads and highways all over the world The prescribed solution to transport problems in most cities has thus been to build more infrastructures for cars with a limited number of cities improving public transport systems in a sustainable manner However a number of challenges faced by urban transport systems such as greenhouse gas emissions noise and air pollution and road traffic accidents do not necessarily get solved by the construction of new infrastructure *Planning and Design for Sustainable Urban Mobility* argues that the development of sustainable urban transport systems requires a conceptual leap The purpose of transportation and mobility is to gain access to destinations activities services and goods Thus access is the ultimate objective of transportation As a result urban planning and design should focus on how to bring people and places together by creating cities that focus on accessibility rather than simply increasing the length of urban transport infrastructure or increasing the movement of people or goods Urban form and the functionality of the city are therefore a major focus of this report which highlights the importance of integrated land use and transport planning This new report of the United Nations Human Settlements Programme UN Habitat the world s leading authority on urban issues provides some thought provoking insights and policy recommendations on how to plan and design sustainable urban mobility systems The Global Report on Human Settlements is the most authoritative and up to date global assessment of human settlements conditions and trends Preceding issues of the report have addressed such topics as Cities in a Globalizing World The Challenge of Slums Financing Urban Shelter Enhancing Urban Safety and Security Planning Sustainable Cities and Cities and Climate Change *Critical Issues in Contemporary China* Czeslaw Tubilewicz, 2016-12-12 *Critical Issues in Contemporary China* Unity Stability and Development comprehensively examines key problems crucial to understanding modern day China Organized around three interrelated themes of unity stability and development each chapter explores distinct issues and debate their significance for China domestically and for Beijing s engagement with the wider world While presenting contending explanatory approaches contributors advance arguments to further critical discussion on selected topics Main issues analysed include political change military transformation legal reforms economic development energy security environmental degradation food security and safety demographic trends migration and urbanization labour unrest health and education social inequalities ethnic conflicts Hong Kong s integration cross Strait relations Given its thorough and up to date assessment of major political social and economic challenges facing China this fully revised and substantially expanded new edition is an essential read for any student of Chinese Studies *Rare Earth Frontiers* Julie M. Klinger, 2018-01-15 *Rare Earth Frontiers* is a work of human geography that serves to demystify the powerful elements that make possible the miniaturization of electronics green energy and medical technologies and essential telecommunications and defense systems Julie Michelle Klinger draws attention to

the fact that the rare earths we rely on most are as common as copper or lead and this means the implications of their extraction are global Klinger excavates the rich historical origins and ongoing ramifications of the quest to mine rare earths in ever more impossible places Klinger writes about the devastating damage to lives and the environment caused by the exploitation of rare earths She demonstrates in human terms how scarcity myths have been conscripted into diverse geopolitical campaigns that use rare earth mining as a pretext to capture spaces that have historically fallen beyond the grasp of centralized power These include legally and logistically forbidding locations in the Amazon Greenland and Afghanistan and on the Moon Drawing on ethnographic archival and interview data gathered in local languages and offering possible solutions to the problems it documents this book examines the production of the rare earth frontier as a place a concept and a zone of contestation sacrifice and transformation

*Global Perspectives on Changing Secondhand Economies* Karen Tranberg Hansen,Jennifer Le Zotte,2022-02-23 Providing interdisciplinary and global perspectives this book examines historical and contemporary changes in secondhand economies including the emergence and specialization of secondhand venues the materials involved as well as the cultural significance of secondhand things and the professions associated with them The objects in focus range from used clothing scrap and waste materials to antiquities and used cars thrift stores and circular economies Growing concerns with sustainability in the West have helped bring about the rediscovery of practices of clothing re use re purposing and re cycling at the same time as major high street retailers are establishing programs to return used clothing to their stores for re sale or recycling As the contributions to this edited volume demonstrate recent concerns with the fast pace and adverse effects of global commodity flows have increased the scholarly attention to secondhand economies both in terms of their history and their significance for livelihoods and sustainability The chapters in this book were originally published as a special issue of the journal Business History
