Our extra pressure boosters feature a high-pressure pump driven by a 100-watt motor. The pump is connected to the main pump by a high-pressure hose. The extra pressure booster is used to increase the pressure of the main pump's output. This is useful for applications that require a higher pressure than the main pump can provide.

The extra pressure booster is a compact, portable unit that can be used in a variety of applications. It is ideal for use in the laboratory, in the field, or in the workshop.
