**Purpose:** To learn to use a dichotomous classification key.

**Materials:** Pictures representing all the classes of the subphylum Vertebrata  
Pictures representing the different invertebrate phyla  
Pictures representing the different classes of the phylum Arthropoda

## Procedure:

1. You will be moving and rotating through various stations set up in the room. At each station you will find a picture of an animal in the animal kingdom.
2. You will have a few minutes to look at the picture of the animal, observe its characteristics and determine its classification within the animal kingdom.
3. The picture will be labeled with either the letter "A" or the letter "B." If there is an "A" on the picture, use the key called "Dichotomous Key to the Classes of the Subphylum Vertebrata." Determine the classification of the vertebrate and record your answer in the data table.
4. If the picture is labeled with the letter "B", use the key called "Dichotomous Key to the Phyla of Invertebrates." Determine the classification of the invertebrate and record your answer in the data table.
5. If the picture is labeled with the letter "B", and you key the animal to the phylum Arthropoda, then use the key called "Dichotomous Key to Selected Classes of the Phylum Arthropoda" to determine what class of arthropods it belongs to. Record your answer in the data table.
