

LANDFORMS

Let's Learn About **RIVERS!**

This is a river in the state of Tennessee. Because the water is this fast, rivers carve, it makes a big groove in it into each rock. This is called a channel. Now do you have a get that river?

Rivers have moving water that flows into lakes, seas, and oceans. Some rivers are very long and wide. Other rivers are small and are sometimes called streams, creeks, or brooks. Rivers can flow down mountains, through valleys, or along plains. (Those are other landforms.) Some rivers have so much fast-moving water, it can cut a deep canyon through rocks!

Rivers can be fun! They are great places to go swimming, fishing, and boating. However, when a lot of rain falls into a river quickly, the water level can rise too high and flood nearby towns. This is dangerous.

THE PARTS OF A RIVER

- **bank** - The land alongside the river, like a "shore"
- **bed** - The floor of the river, often mud and rocks
- **mouth** - The place where the river ends, such as into a lake, sea, or ocean

A TABLE OF RIVERS

River	Continent	Length
Amazon	South America	3,476 miles
Congo	Africa	2,422 miles
Mississippi	North America	3,902 miles
Nile	Africa	4,352 miles

Let's Learn About **LAKES!**

This is the Myakka Lake in Sarasota, Florida. It is fed by the Myakka River and is home to many different plants and animals. Every weekend, people visit the lake to go fishing and swimming. Swimming is not allowed in this lake. Can you guess why?

A lake is a body of water that is surrounded by land. A lake is deeper than a pond and, unlike a lagoon, a lake is not part of an ocean. Most lakes are filled by rivers and streams. Many animals, like birds, fish, and alligators, depend on lake habitats for shelter and food.

In places where it is very cold during the winter, some lakes freeze and become solid ice on the surface. If an adult says it's safe, a frozen lake can be a fun place to go ice skating or ice fishing.

These waters are beginning to freeze.

There are many ways lakes and oceans are alike and different. Both are bodies of water, but oceans are much larger than lakes. Let's take a look at other ways lakes and oceans are alike and different.
