INTRODUCTION

This Landmaster machine has been designed to combine the best features of the original and proved smaller commercial range of Landmaster machines.

This advanced machine is powered by a tough reliable engine, carefully selected to give satisfactory performance for the wide range of tasks of which the machine is capable, with economy and long life characteristics for the owner who observes a few simple rules of operation and care.

This is the ideal machine for those with multiple sized gardens who seek to take the heavy physical work out of flower, vegetable and grass cultivation routines.

No task is too great to adapt the machine—attachments are available for digging, tining, weeding, ridging, lawn mowing, grass mowing and hedge trimming—all these can be tried to the novice in minutes who will then possess the key to a whole series of different power gardening techniques.

The engine speed control, or throttle lever, is conveniently located on the handlebars and has clearly marked settings. A choke lever is positioned below the engine on start.

The clutch mechanism conveys drive from the engine pulley to the drive shaft pulley. When the clutch lever is in the down (disengaged) position, the engine is free-running.
