Language Change Progress Or Decay Cambridge:

Language Change Jean Aitchison, 2012-12-20 How and why do languages change Where does the evidence of language change come from How do languages begin and end This introduction to language change explores these and other questions considering changes through time The central theme of this book is whether language change is a symptom of progress or decay This book will show you why it is neither and that understanding the factors surrounding how language change occurs is essential to understanding why it happens This updated edition remains non technical and accessible to readers with no previous knowledge of linguistics

Language Change Jean Aitchison, 2001 This is a lucid and up to date overview of language change It discusses where our evidence about language change comes from how and why changes happen and how languages begin and end It considers both changes which occurred long ago and those currently in progress It does this within the framework of one central question is language change a symptom of progress or decay It concludes that language is neither progressing nor decaying but that an understanding of the factors surrounding change is essential for anyone concerned about language alteration For this substantially revised third edition Jean Aitchison has included two new chapters on change of meaning and grammaticalization Sections on new methods of reconstruction and ongoing chain shifts in Britain and America have also been added as well as over 150 new references The work remains non technical in style and accessible to readers with no previous knowledge of linguistics

Language Change ,1991 *Language Change* Anna

Mauranen, Svetlana Vetchinnikova, 2020-12-03 English as a lingua franca ELF has become ubiquitous in today's globalised mobile and fast changing world It is clear that it will have an unprecedented impact not only on how we communicate but also on our understanding of language use and change What exactly ELF brings to our life and to language theory is a question which requires an interdisciplinary take This book gathers together leading scholars from world Englishes typology language history cognitive linguistics translation studies multilingualism sociolinguistics and ELF research itself to seek state of the art answers Chapters present original insights on language change based on theoretical approaches and empirical studies and provide clear examples of social interactional and cognitive changes that ELF instigates The picture which unfolds on the pages of this book is complex dynamic and makes a convincing case for the importance of English as a lingua franca on language change at a global scale

The Diachrony of Written Language Contact Nikolaos

Lavidas, 2021-12-13 Nobody can deny that an account of grammatical change that takes written contact into consideration is a significant challenge for any theoretical perspective Written contact of earlier periods or from a diachronic perspective mainly refers to contact through translation The present book includes a diachronic dimension in the study of written language contact by examining aspects of the history of translation as related to grammatical changes in English and Greek in a contrastive way In this respect emphasis is placed on the analysis of diachronic retranslations the book examines translations from earlier periods of English and Greek in relation to various grammatical characteristics of these languages

in different periods and in comparison to non translated texts Youth Language Practices in Africa and Beyond Nico Nassenstein,Andrea Hollington,2015-09-14 Youth languages have increasingly attracted the attention of scholars and students of various disciplines African youth languages are a vibrant phenomenon with manifold characteristics involving a range of different languages This book is a first comprehensive study of African youth languages and presents fresh insights into various youth languages providing linguistic as well as sociolinguistic data and analyses **English in Southeast Asia** Ee-Ling Low,Azirah Hashim,2012-01-24 This volume provides a first systematic comprehensive account of English in Southeast Asia SEA based on current research by leading scholars in the field The volume first provides a systematic account of the linguistic features across all sub varieties found within each country It also has a section dedicated to the historical context and language planning policies to provide a background to understanding the development of the linguistic features covered in Part I and finally the vibrancy of the sociolinguistic and pragmatic realities that govern actual language in use in a wide variety of domains such as the law education popular culture electronic media and actual pragmatic encounters are also given due coverage This volume also includes an extensive bibliography of works on English in SEA thus providing a useful and valuable resource for language researchers linguists classroom educators policy makers and anyone interested in the topic of English in SEA or World Englishes as a whole **Synchronic English Linguistics** Paul Georg Meyer,2005

Morphosyntactic Issues in Second Language Acquisition Danuta Gabryś,2008 This volume presents a selection of second language acquisition studies at the level of morphosyntax It looks at different aspects of morphosyntactic development of bilingual language learners users such as language transfer syntactic processing morphology and the pragmatics of language among others The studies report on projects carried out in different language contact contexts ranging from English German Polish Greek and Turkish The volume also includes those studies which show the interface between research findings and pedagogy of foreign language teaching Negation and Nonveridicality in the History of Greek Katerina Chatzopoulou,2019 This book provides a thorough investigation of the expression of sentential negation in the history of Greek based on extensive data from major stages of the language It also provides a new semantic interpretation of Jespersen s cycle that explains the Greek developments and those in other languages **Theories of Knowing and Knowledge Production** Kofi Kissi Dompere,2024-09-26 The book is devoted to exploring the organizational dimensions of the general space of problem solution dualities within epistemic fields to examine the diversity and unity of knowing and information knowledge production in science and non science and how to account for and explain the forces of variety transformations as induced by decision choice actions in creating the functor space and the space of categorial converters as well as to integrate decision choice qualities of curiosity creativity hope despair success failure and their relationships with epistemic anomalies in the production of intellectual investment flows and capital stocks and the rise and fall of institutions in response to the dynamics of the open space of problem solution dualities with open algorithms under the principle of non satiation The conditions and

sources of uncertainties in human actions are traced through the space of ontic epistemic dualities as generated by cognitive capacity limitations leading to the concepts of imagination possibility and probability with corresponding worlds and then link to the discussions on thinking reasoning processes with goals objectives and visions of education in social set ups The concepts and phenomena of anticipation necessity expectation freedom anomaly curiosity creativity hope despair success and failure contained in the space of imaginations are defined under the concepts of onticity and epistemicity where their roles in the dualistic polar journeys are discussed analyzed and connected to epistemic transversality conditions under the principle of opposites relative to the conditions of input output and cost benefit dualities The book is to fill in some of the important phenomena needed in my investigation of theory of knowing as a production of intellectual investment flows and information knowledge accumulation as the production of intellectual capital stocks relative to the disequilibrium dynamics of human intellectual heritage based on fuzzy paradigm of thought thus providing an added foundation in integrating subjective elements into the development of open artificial intelligence where cost benefit values operate to determine varieties over the spaces of true false and yes no dualities in machine learning

Language and Identity in Modern Egypt Reem Bassiouney, 2015-01-27 Focussing on nationalist discourse before during and after the revolution of 2011 Reem Bassiouney explores the two way relationship between language in Egyptian public discourse and Egyptian identity Her sources include newspaper articles caricatures

English with an Accent Rosina Lippi-Green, 2012-03-15 Since its initial publication *English with an Accent* has provoked debate and controversy within classrooms through its in depth scrutiny of American attitudes towards language Rosina Lippi Green discusses the ways in which discrimination based on accent functions to support and perpetuate social structures and unequal power relations This second edition has been reorganized and revised to include new dedicated chapters on Latino English and Asian American English discussion questions further reading and suggested classroom exercises updated examples from the classroom the judicial system the media and corporate culture a discussion of the long term implications of the Ebonics debate a brand new companion website with a glossary of key terms and links to audio video and images relevant to the each chapter s content *English with an Accent* is essential reading for students with interests in attitudes and discrimination towards language

Experience Counts: Frequency Effects in Language Heike Behrens, Stefan Pfänder, 2016-02-22 Frequency has been identified as one of the most influential factors in language processing and plays a major role in usage based models of language learning and language change The research presented in this volume challenges established models of linguistic representation Instead of learning and processing language compositionally larger units and co occurrence relations are at work The main point taken by the authors is that by studying the effect of distributional patterns and changes in such patterns we can establish a unified framework that explains the dynamics of language systems with a limited set of processing factors

Key Concepts in Language and Linguistics Robert Lawrence Trask, 1999 A comprehensive critical work *Key Concepts in Language and Linguistics* is a highly readable A Z

guide to the main terms and concepts used in the study of language and linguistics The Oxford Handbook of Language Contact Anthony P. Grant, 2020-01-10 Every language has been influenced in some way by other languages In many cases this influence is reflected in words which have been absorbed from other languages as the names for newer items or ideas such as perestroika manga or intifada from Russian Japanese and Arabic respectively In other cases the influence of other languages goes deeper and includes the addition of new sounds grammatical forms and idioms to the pre existing language For example English s structure has been shaped in such a way by the effects of Norse French Latin and Celtic though English is not alone in its openness to these influences Any features can potentially be transferred from one language to another if the sociolinguistic and structural circumstances allow for it Further new languages pidgins creoles and mixed languages can come into being as the result of language contact In thirty three chapters The Oxford Handbook of Language Contact examines the various forms of contact induced linguistic change and the levels of language which have provided instances of these influences In addition it provides accounts of how language contact has affected some twenty languages spoken and signed from all parts of the world Chapters are written by experts and native speakers from years of research and fieldwork Ultimately this Handbook provides an authoritative account of the possibilities and products of contact induced linguistic change **A General Theory of Entropy** Kofi Kissi Dompere, 2019-08-02 This book presents an epistemic framework for dealing with information knowledge and certainty uncertainty problems within the space of quality quantity dualities It bridges between theoretical concepts of entropy and entropy measurements proposing the concept and measurement of fuzzy stochastic entropy that is applicable to all areas of knowing under human cognitive limitations over the epistemological space The book builds on two previous monographs by the same author concerning theories of info statics and info dynamics to deal with identification and transformation problems respectively The theoretical framework is developed by using the toolboxes such as those of the principle of opposites systems of actual potential polarities and negative positive dualities under different cost benefit time structures The category theory and the fuzzy paradigm of thought under methodological constructionism reductionism duality are used in the fuzzy stochastic and cost benefit spaces to point to directions of global application in knowing knowledge and decision choice actions Thus the book is concerned with a general theory of entropy showing how the fuzzy paradigm of thought is developed to deal with the problems of qualitative quantitative uncertainties over the fuzzy stochastic space which will be applicable to conditions of soft hard data fact evidence and knowledge over the spaces of problem solution dualities decision choice actions in sciences non sciences engineering and planning sciences to abstract acceptable information knowledge elements **Language Origins** Maggie Tallerman, 2005-05-27 This book addresses central questions in the evolution of language where it came from how it relates to primate communication how and why it evolved how it came to be culturally transmitted and how languages diversified The chapters are written from the perspective of the latest work in linguistics neuroscience psychology and computer science

and reflect the idea that various cognitive physical neurological social and cultural prerequisites led to the development of full human language Some of these evolutionary changes were preadaptations for language while others were adaptive changes allowing the development of particular linguistic characteristics The authors consider a broad spectrum of ideas about the conditions that led to the evolution of protolanguage and full language Some examine changes that occurred in the course of evolution to Homo sapiens others consider how languages themselves have adapted by evolving to be learnable Some chapters look at the workings of the brain and others deploy sophisticated computer simulations that model such aspects as the emergence of speech sounds and the development of grammar All make use of the latest methods and theories to probe into the origins and subsequent development of the only species that has language The book will interest a wide range of linguists cognitive scientists biologists psychologists neuroscientists and experts in artificial intelligence as well as all those fascinated by issues puzzles and problems raised by the evolution of language

Continuity and Change in Grammar Anne Breitbarth, Christopher Lucas, Sheila Watts, David Willis, 2010-07-29 One of the principal challenges of historical linguistics is to explain the causes of language change Any such explanation however must also address the actuation problem why is it that changes occurring in a given language at a certain time cannot be reliably predicted to recur in other languages under apparently similar conditions The sixteen contributions to the present volume each aim to elucidate various aspects of this problem including What processes can be identified as the drivers of change How central are syntax external phonological lexical or contact based factors in triggering syntactic change And how can all of these factors be reconciled with the actuation problem Exploring data from a wide range of languages from both a formal and a functional perspective this book promises to be of interest to advanced students and researchers in historical linguistics syntax and their intersection

The Theory of Info-Dynamics: Rational Foundations of Information-Knowledge Dynamics Kofi K. Dompere, 2017-12-06 This book focuses on the development of a theory of info dynamics to support the theory of info statics in the general theory of information It establishes the rational foundations of information dynamics and how these foundations relate to the general socio natural dynamics from the primary to the derived categories in the universal existence and from the potential to the actual in the ontological space It also shows how these foundations relate to the general socio natural dynamics from the potential to the possible to give rise to the possibility space with possibilistic thinking from the possible to the probable to give rise to possibility space with probabilistic thinking and from the probable to the actual to give rise to the space of knowledge with paradigms of thought in the epistemological space The theory is developed to explain the general dynamics through various transformations in quality quantity space in relation to the nature of information flows at each variety transformation The theory explains the past present future connectivity of the evolving information structure in a manner that illuminates the transformation problem and its solution in the never ending information production within matter energy space under socio natural technologies to connect the theory of info statics which in turn presents

explanations to the transformation problem and its solution The theoretical framework is developed with analytical tools based on the principle of opposites systems of actual potential polarities negative positive dualities under different time structures with the use of category theory fuzzy paradigm of thought and game theory in the fuzzy stochastic cost benefit space The rational foundations are enhanced with categorial analytics The value of the theory of info dynamics is demonstrated in the explanatory and prescriptive structures of the transformations of varieties and categorial varieties at each point of time and over time from parent offspring sequences It constitutes a general explanation of dynamics of information knowledge production through info processes and info processors induced by a socio natural infinite set of technologies in the construction destruction space
