2	<b>Command of the language is limited.</b> Vocabulary is sometimes appropriate to the task. Basic grammatical structures are used. Language contains errors in basic structures. Errors interfere with communication.	2	<b>The task is partially fulfilled.</b> Few ideas are relevant to the task. Ideas are stated, but with no development. Ideas are not clearly presented and do not follow a logical structure, making the message difficult to determine.	2	<b>Conceptual understanding is limited.</b> The choice of text type is generally inappropriate to the context, purpose or audience. The register and tone are inappropriate to the context, purpose and audience of the task. The response incorporates limited recognizable conventions of the chosen text type.
3	<b>Command of the language is partially effective.</b> Vocabulary is appropriate to the task. Some basic grammatical structures are used, with some attempts to use more complex structures. Language is mostly accurate for basic structures, but errors occur in more complex structures. Errors at times interfere with communication.	3	<b>The task is generally fulfilled.</b> Some ideas are relevant to the task. Ideas are outlined, but are not fully developed. Ideas are generally clearly presented and the response is generally structured in a logical manner, leading to a mostly successful delivery of the message.	3	<b>Conceptual understanding is mostly demonstrated.</b> The choice of text type is generally appropriate to the context, purpose and audience. The register and tone, while occasionally appropriate to the context, purpose and audience of the task, fluctuate throughout the response. The response incorporates some conventions of the chosen text type.
4	<b>Command of the language is effective and mostly accurate.</b> Vocabulary is appropriate to the task, and varied. A variety of basic and more complex grammatical structures is used. Language is mostly accurate. Occasional errors in basic and in complex grammatical structures do not interfere with communication.	4	<b>The task is fulfilled.</b> Most ideas are relevant to the task. Ideas are developed well, with some detail and examples. Ideas are clearly presented and the response is structured in a logical manner, supporting the delivery of the message.	4	<b>Conceptual understanding is fully demonstrated.</b> The choice of text type is appropriate to the context, purpose and audience. The register and tone are appropriate to the context, purpose and audience of the task. The response fully incorporates the conventions of the chosen text type.
5	<b>Command of the language is mostly accurate and very effective.</b> Vocabulary is appropriate to the task, and varied, including the use of idiomatic expressions. A variety of basic and more complex grammatical structures is used effectively. Language is mostly accurate. Minor errors in more complex grammatical structures do not interfere with communication.	5	<b>The task is fulfilled effectively.</b> Ideas are relevant to the task. Ideas are fully developed, providing details and relevant examples. Ideas are clearly presented and the response is structured in a logical and coherent manner that supports the delivery of the message.

**Embodied and grounded cognition** Anna Borghi,Diane Pecher,2012-01-01 In the last 10 15 years the embodied and grounded cognition approach has become widespread in all fields related to cognitive science such as cognitive and social psychology

neuroscience philosophy anthropology computational modelling and robotics According to this approach our cognitive activity is grounded in sensory motor processes and situated in specific contexts and situations Therefore in this view concepts consist of the reactivation of the same neural pattern that is present when we perceive and or interact with the objects they refer to In the same way understanding language would imply forming a mental simulation of what is linguistically described This simulation would entail the recruitment of the same neurons that are activated when actually acting or perceiving the situation action emotion object or entity described by language In the last years a lot of evidence has been collected in favour of EC and GC view The aim of this Research Topic is twofold First it intends to give an idea of the field of embodied and grounded cognition in its broadness We therefore intend to invite scientists of different disciplines anthropology philosophy linguistics cognitive and social psychology neuroscience computer science to submit their proposals The second aim of this Research Topicis to focus on some challenges that in our opinion embodied and grounded theories of cognition need to face First we believe that one important challenge for EC and GC views is to account for the way the so called abstract concepts and abstract words are represented Evidence on the representation of concrete concepts and words is compelling whereas evidence on abstract concepts representation is still too scarce and limited to restricted domains We therefore welcome proposals dealing with this complex issue Second we think that embodied and grounded theories of cognition would need to formulate more precise hypotheses and that in general within the field a larger theoretical effort should be made It is striking that even if a lot of work in the field of computational modelling and robotics starts from an embodied approach experimental and modelling work on embodied cognition remain somehow separate We therefore invite researchers to submit papers proposing models which might help to explain phenomena as well as to constrain and specify in more detail the predictions and the claims advanced within the framework of EC and GC theories
