Navy Department, 1987 Handbook of Mathematical Models in Computer Vision Nikos Paragios, Yunmei Chen, Olivier D. Faugeras, 2006-01-16 Abstract Biological vision is a rather fascinating domain of research Scientists of various origins like biology medicine neurophysiology engineering mathematics etc aim to understand the processes leading to visual perception process and at reproducing such systems Understanding the environment is most of the time done through visual perception which appears to be one of the most fundamental sensory abilities in humans and therefore a significant amount of research effort has been dedicated towards modelling and reproducing human visual abilities Mathematical methods play a central role in this endeavour Introduction David Marr's theory was a pioneering step towards understanding visual perception In his view human vision was based on a complete surface reconstruction of the environment that was then used to address visual subtasks This approach was proven to be insufficient by neurobiologists and complementary ideas from statistical pattern recognition and artificial intelligence were introduced to better address the visual perception problem In this framework visual perception is represented by a set of actions and rules connecting these actions The emerging concept of active vision consists of a selective visual perception paradigm that is basically equivalent to recovering from the environment the minimal piece of information required to address a particular task of interest *Effective Healthcare Information Systems* Armoni, Adi, 2001-07-01 Enterprise evolution or electronic enterprise is the road map to well planned evolution of enterprise complexity with business and system strategies integration through standardized and synchronized architectures of IT components This book provides a method of how to analyze design and manage the applications of IT in a complex evolving enterprise It provides a vision for IT leaders with practical solutions for IT implementation **Appendix to the Journals of the House of Representatives of New Zealand** New Zealand.
