

# Parking Barrier Gate Model G-90 CD Series™

## Design and Function

The Model G-90 CD Series Barrier Gate provides microcomputer intelligence, multiple programming options, and on-board controls for a complete and user-friendly information center providing total lane management.

## Protect Your Investment

The Model G-90 CD Series Gate continues the outstanding tradition of high quality that you

depend on from Federal APD. The gate is extremely durable, protected from the harshest environments with a heavy-gauge aluminum cabinet armored with an element-resistant finish which keeps your installation looking clean and new for years of rust-free service.

## Omega LCD Controller™

The heart of this gate is the Omega LCD Controller. This fully integrated controller provides a systems approach for convenient, accurate and cost-effective lane management.

## Lane Configuration

The Model G-90 CD Series Gate can handle any type of lane configuration possible - including reversing lanes and lanes with three vehicle detectors - with software options embedded into the unit's Configuration Module. The Configuration Module is an encapsulated pc board that utilizes surface mounted technology. This factory programmed microcontroller plugs into the power board and defines the software options used in the gate.

## Counts You Can Count On

The Model G-90 CD Series allows you to design an on-board information center with counting functions packaged in one self-contained device. The controller's software logic integrates optional counting functions such as resettable and non-resettable totalizing counts, single and dual differential counts, hourly counts, and a host of statistical counts. These counts are displayed on the controller's visual display and are accessed by the user-friendly, menu driven keypad.

## Vehicle Detectors

Three built-in and automatically self-tuning vehicle detectors are available. These high-speed detectors provide a sensitive tailgate recognition system that is capable of recognizing two separate vehicles traveling over a detector loop simultaneously. Diagnostics and metering tools are also built into the controller.

## Sensitive Reversing Logic™

An advanced, maintenance-free safety and monitoring system is designed into every gate: the Sensitive Reversing Logic (SRL). This system provides safer gate operations by instantly sensing gate arm obstructions, broken gate arms, limit switch failures, and gate arm position - without the use of electromechanical systems. The SRL sensing system also features self-tuning capabilities.

## Features:

- Advanced Omega LCD Controller with visual display
- Power Supply Board provides multiple input/output terminals
- Total lane management with:
  - Two built-in vehicle detectors
  - Sensitive Reversing Logic
  - Built-in diagnostics
  - Event history report
  - Back-out timer
  - 7 day memory & data storage

## Options:

- Configuration Module
- Third built-in vehicle detector
- Totalizing & differential counts
- Automatic time zone controls
- Hourly statistical reports
- Directional logic
- Broken gate arm alarm
- Communications interface
