- 3.3.2 Determine the numerical value for the 11<sup>th</sup> term. (2)

- 3.4 James and John look at the following patterns:

Pattern 1	Pattern 2	Pattern 3
		
		
		

James says if he increases the pattern number by one, square that number and then subtract the pattern number increased by one he will get the general formula.

John says he can derive the general formula for the number of blocks by taking the number of columns in each pattern and multiplying it by the number of rows.

- Who is correct between James and John? Prove your answer. (5)
- [P4]**

**QUESTION 4**

Given:  $f(x) = \frac{x^2}{x+1} - 1$  and  $g(x) = -x^2$ . The point  $(1, -3)$  lies on  $g$ .

- 4.1 Determine the value of  $x$ . (2)

*Teaching Formal Methods* C. Neville Dean, Raymond T. Boute, 2004-10-11 Professional engineers can often be distinguished from other designers by the engineers ability to use mathematical models to describe and 1 analyze their products This observation by Parnas describes the de facto professional standards in all classical engineering disciplines civil mechanical electrical etc Unfortunately it is in sharp contrast with current industrial practice in software design where mathematical models are hardly used at all even by those who 2 in Holloway's words aspire to be engineers The rare exceptions are certain critical applications where mathematical techniques are used under the general name formal methods Yet the same characteristics that make formal methods a necessity in critical applications make them also advantageous in everyday software design at various levels from design efficiency to software quality Why then is education failing with respect to formal methods failing to convince students academics and practitioners alike that formal methods are truly pragmatic failing to overcome a phobia of formality and mathematics failing to provide students with the basic skills and understanding required

to adopt more mathematical and logical approach to software development Until education takes these failings seriously formal methods will be an obscure byway in software engineering which in turn will remain severely impoverished as a result
