International Handbook on Education in Southeast Asia Lorraine Pe Symaco,Martin Hayden,2021-12-23 This International Handbook provides a detailed account of the education systems of 11 Southeast Asian nations including Brunei Darussalam Cambodia Indonesia Lao People s Democratic Republic Malaysia Myanmar the Philippines Singapore Thailand Timor Leste and Vietnam It presents a systematic sector by sector explanation of how these national education systems deliver educational services and respond to national and international issues and challenges With 56 chapters the International Handbook is the region s most comprehensive educational reference source In the first of its chapters the editors introduce the regional context and draw attention to the distinctive characteristics of each of the 11 systems Southeast Asia representing 8.5% of the world s population is as dynamic as it is diverse The International Handbook charts progress and establishes a benchmark for documenting future developments It also provides a stepping off point for more detailed investigations of decision making processes and outcomes across the 11 national education systems **Teaching and Learning Secondary School Mathematics** Ann Kajander,Jennifer Holm,Egan J Chernoff,2018-10-24 This volume brings together recent research and commentary in secondary school mathematics from a breadth of contemporary Canadian and International researchers and educators It is both representative of mathematics education generally as well as unique to the particular geography and culture of Canada The chapters address topics of broad applicability such as technology in learning mathematics recent interest in social justice contexts in the learning of mathematics as well as Indigenous education The voices of classroom practitioners the group ultimately responsible for implementing this new vision of mathematics teaching and learning are not forgotten Each section includes a chapter written by a classroom teacher making this volume unique in its approach We have much to learn from one another and this volume takes the stance that the development of a united vision supported by both research and professional dialog provides the first step *Education in Cambodia* Vincent McNamara,Martin Hayden,2022-05-14 This book is the most comprehensive account yet published about the education system in Cambodia It covers all system levels and draws upon the knowledge and insights of a wide range of leading Cambodian and foreign scholars The book focuses on how the system has developed and is making progress Significant achievements over the past two decades are evident but many problems remain including the poor quality of teaching research and institutional management Under funding is an ongoing obstacle but so too is a bureaucratic culture of resistance to change a history of weak governance and an anti reform sentiment deriving from a teacher centred and exam driven curriculum Achieving international standards must now be the system s highest priority To this end the system must rid itself of conservatism complacency and manipulation by parochial vested interests **Improving Primary Mathematics Education, Teaching and Learning** Mellony Graven,Hamsa Venkat,2017-01-19 This book focuses on how to

improve the teaching and learning of primary level mathematics education within resource constrained contexts It builds on two large numeracy projects within South Africa which speak to broader global concerns and highlight how research and development not only enables one to meet ethical imperatives but also explore how further interventions can be developed Teacher and research communities must work together to create mutually beneficial relationships and establish a cohesive understanding of the requirements of primary mathematics education

Una aproximación a través de árboles de decisión**

López-Martín, Esther, Expósito-Casas, Eva, Carpintero Molina, Elvira, El presente trabajo analiza los datos de España en PISA 2015 con los objetivos de identificar los factores que más se relacionan con la competencia científica y describir el perfil de los estudiantes con mayor y menor desempeño en la prueba de ciencias en función de las variables de contexto Para ello se ha utilizado una técnica multivariada de clasificación basada en árboles de decisión con el algoritmo CART Classification and Regression Trees Tras el estudio descriptivo exploratorio realizado se presenta la selección y jerarquía de las características contextuales del estudiante que más se relacionan con su nivel competencial en ciencias El grado al que asiste el estudiante junto con sus expectativas académicas y la repetición de curso son las variables que de forma global mejor

predicen el rendimiento en ciencias de los estudiantes españoles de 15 años. A su vez los resultados relativos al desempeño en grupos de estudiantes extremos de alto y bajo rendimiento permiten profundizar en el análisis identificándose aquellas variables con una incidencia diferencial para ambos colectivos. Entre las principales conclusiones del estudio destaca la importancia de la labor que se realiza en los centros educativos ya que la trayectoria académica y las variables psicoeducativas parecen tener un mayor efecto sobre los resultados académicos de los estudiantes que sus características socioeconómicas. La discusión profundiza en las principales implicaciones de estos resultados para una mejora de la enseñanza de las ciencias en España que pueda verse reflejada en la disminución de alumnos rezagados así como en el aumento del desempeño medio y especialmente del número de alumnos situados en niveles de excelencia.
