LUBRICATION AND MAINTENANCE

Manufacturer recommends changing oil after first 50 hours of operation. Oil should be changed at 500-hour intervals thereafter. All gearboxes require GL-5 grade EP 80/90 gear oil for lubrication. Some units may be equipped with a grease fitting for lubrication of the output shaft bearings (grease up applications). The shaft bearings should be greased regularly at every 50 operating hours with a lithium or EP bearing grease. In grease down applications, gearbox oil will lubricate shaft bearings.
