THE EARTH AS A SYSTEM

Week 1

What is a "system"?

It can be described as a group of things/different parts that work together to make something work.

Different parts of the Earth:

Air

Land / country

Water

Life

These are called "spheres". there is no beginning and end in a sphere, therefore, it can also be called a "cycle".

Let's analyze each sphere:

Atmosphere - it is a layer of gases around the Earth.

Hydrosphere – this refers to water in various forms; liquid, solid and gas.

Lithosphere – this is solid rock and soil that makes up the Earth's surface.
