The Emotions of Protest James M. Jasper,2018-05-24 In Donald Trump s America protesting has roared back into fashion The Women s March held the day after Trump s inauguration may have been the largest in American history and resonated around the world Between Trump s tweets and the march s popularity it is clear that displays of anger dominate American politics once again There is an extensive body of research on protest but the focus has mostly been on the calculating brain a byproduct of structuralism and cognitive studies and less on the feeling brain James M Jasper s work changes that as he pushes the boundaries of our present understanding of the social world In The Emotions of Protest Jasper lays out his argument showing that it is impossible to separate cognition and emotion At a minimum he says we cannot understand the Tea Party or Occupy Wall Street or pro and anti Trump rallies without first studying the fears and anger moral outrage and patterns of hate and love that their members feel This is a book centered on protest but Jasper also points toward broader paths of inquiry that have the power to transform the way social scientists picture social life and action Through emotions he says we are embedded in a variety of environmental bodily social moral and temporal contexts as we feel our way both consciously and unconsciously toward some things and away from others Politics and collective action
