Jansen,2019-11-05

This volume brings together many of South Africa's leading scholars of education and covers the full range of South African schooling from financing and policy reform to in depth discussions of literacy numeracy teacher development and curriculum change. The book moves beyond a historical analysis and provides an inside view of the questions South African scholars are now grappling with. Are there different and preferential equilibria we have not yet thought of or explored and if so what are they? In practical terms how does one get to a more equitable distribution of teachers' resources and learning outcomes? While decidedly local, these questions resonate throughout the developing world. South Africa today is the most unequal country in the world. The richest 10% of South Africans lay claim to 65% of national income and 90% of national wealth. This is the largest 90/10 gap in the world and one that is reflected in the schooling system. Two decades after apartheid it is still the case that the life chances of most South African children are determined not by their ability or the result of hard work and determination but instead by the colour of their skin, the province of their birth and the wealth of their parents. Looking back on almost three decades of democracy in South Africa it is this stubbornness of inequality and its patterns of persistence that demands explanation, justification and analysis. This is a landmark book on basic education in South Africa, an essential volume for those interested in learning outcomes and their inequality in South Africa. The various chapters present conceptually and empirically sophisticated analyses of learning outcomes across divisions of race, class and place. The book brings together the wealth of decades of research output from top quality researchers to explore what has improved, what has not and why. Prof Lant Pritchett, Harvard University. There is much wisdom in this collection from many of the best education analysts in South Africa. No surprise that they conclude that without a large and sustained expansion in well trained teachers, early childhood education and adequate school resources, South Africa will continue to sacrifice its people's future to maintaining the privileges of the few. Prof Martin Carnoy, Stanford University. Altogether one can derive from this very valuable volume, if not an exact blueprint for the future, then certainly at least a crucial and evidence based itinerary for the next few steps. Dr Luis Crouch, RTI.

*Youth Unemployment Scenarios* Maximilian Matschke, 2022-10-27. This book examines the factors driving youth unemployment in South Africa, exploring potential future outcomes of its mass unemployment and offering a variety of strategies to avoid an impending crisis in the country. Utilizing scenario analysis rooted in complex systems theory while building on statistical and field research, the author illustrates four possible future states of youth employment in South Africa in the year 2040. This includes the South African version of the Arab Spring, where young people riot or agitate for extreme political and social change because of a belief that access to education and jobs is only possible through social status or corruption. Spring: fair access to a high number of jobs supported by Chinese interventions. Summer: a technology driven decline in the number of jobs where merit based access for youth is granted. Fall and the collapse of the economy with the economy collapsing and youth becoming increasingly desperate. Winter: The author then presents five strategies to fight youth unemployment, including training of youth to start businesses, stimulating small

and medium sized enterprises and sending unemployed youth abroad for skills development and to where their labour is needed This book will be of interest to scholars of South African politics and economics labour economics and youth studies and readers with an interest in tackling youth unemployment independent of the country
