BOOK JACKET **Easy Checklists for Essays** Lee B. Sherry, 2004-11-09 *Next Generation Genres: Teaching Writing for Civic and Academic Engagement* Jessica Singer Early, 2022-11-29 Students need updated writing genres and a real reason to write. Evolutions in technology and connectivity have brought about significant changes in the ways writing is produced and shared. Yet despite monumental shifts in the practice of writing, how we teach writing has remained largely static. What we need is a new set of genres for writing instruction: genres that will speak to students who are already immersed in rich and multifaceted literacy practices through social media, gaming, and new technologies. Jessica S. Early's *Next Generation Genres* provides an alternative framework for a secondary writing curriculum that places a central emphasis on helping students gain the experience they need to write with confidence in academic and civic life. If your students' eyes glaze over when they face a standard essay assignment, perhaps it's time to let them try writing an infographic or a podcast.

Intelligence, Creativity and Fantasy Mário S. Ming Kong, Maria do Rosário Monteiro, Maria João Pereira Neto, 2019-09-30 The texts presented in *Proportion, Harmonies and Identities: PHI INTELLIGENCE CREATIVITY AND FANTASY* were compiled with the intent to establish a multidisciplinary platform for the presentation, interaction, and dissemination of research. The aim is also to foster the awareness and discussion on the topics of Harmony and Proportion with a focus on different visions relevant to Architecture, Arts, and Humanities, Design, Engineering, Social and Natural Sciences, and their importance and benefits for the sense of both individual and community identity. The idea of modernity has been a significant motor for development since the Western Early Modern Age. Its theoretical and practical foundations have become the working tools of scientists, philosophers, and artists who seek strategies and policies to accelerate the development process in different contexts.

Freud and the Scene of Trauma John Fletcher, 2013-12-02 This book argues that Freud's mapping of trauma as a scene is central to both his clinical interpretation of his patients' symptoms and his construction of successive theoretical models and concepts to explain the power of such scenes in his patients' lives. This attention to the scenic form of trauma and its power in determining symptoms leads to Freud's break from the neurological model of trauma he inherited from Charcot. It also helps to explain the affinity that Freud and many since him have felt between psychoanalysis and literature and artistic production more generally, and the privileged role of literature at certain turning points in the development of his thought. It is Freud's scenography of trauma and fantasy that speaks to the student of literature and painting. Overall, the book develops the thesis of Jean Laplanche that in Freud's shift from a traumatic to a developmental model, along with the undoubted gains embodied in the theory of infantile sexuality, there were crucial losses: specifically, the recognition of the role of the adult other and the traumatic encounter with adult sexuality that is entailed in the ordinary nurture and formation of the infantile subject.
