sur l'expérience professionnelle de l'auteur qui a passé plus de quarante ans au cœur de ce système. De l'enseignement secondaire aux cabinets des ministres de l'Education son parcours lui a permis non seulement d'observer la réalité du terrain mais également de prendre du recul et d'apprendre dans leur globalité les réalités plurielles du monde scolaire. Il nous livre ainsi un témoignage authentique et des analyses objectives. Ce texte polyphonique qui mêle anecdotes et réflexions personnelles, positions politiques et recherches articule autour de trois grands axes. Après une présentation des thématiques majeures des débats contemporains concernant les politiques d'éducation et d'enseignement, l'auteur pointe les forces et les faiblesses du système actuel afin d'identifier les actions transformatrices nécessaires. Il sintèse enfin aux pistes et dispositifs déjà mis en place ainsi qu'aux choix politiques qu'il conseille pour faire émerger l'école de demain. Fort d'une solide expérience de terrain l'auteur nous livre dans cet essai son témoignage et ses positions ainsi qu'une analyse objective et globale tout en explorant les différentes voies possibles pour l'enseignement de demain.

EXTRAIT

La majorité des acteurs du système scolaire belge francophone gardent quant eux la conviction qu'un redoublement permet l'élève de repartir sur de bonnes bases. Mais si cette doctrine se vérifie dans un certain nombre de cas particulièrement de ce que j'ai pu observer lorsque l'élève bénéficie d'un soutien parental il y a lieu de se demander si le redoublement constitue une réponse pédagogique adéquate, profonde et durable aux difficultés rencontrées par les apprenants. Les recherches et publications de Marcel Crahay qui a beaucoup travaillé cette thématique ont montré que les élèves qui endettent de leurs lacunes ou difficultés n'ont pas tardé dans leur parcours scolaire rejoindre davantage moyen et long termes le niveau de leurs condisciples et le niveau requis que les élèves qui ont redoublé une année. Ces derniers après une embellie souvent très brève renouent souvent avec l'échec ce qui diminue tout le moins que le redoublement présente des limites. Ainsi dans bien des conseils de classe au cours du deuxième trimestre de l'année scolaire recommandé on relève un certain essoufflement des doubleurs. En outre le redoublement peut affecter de manière durable et profonde la confiance de l'élève dans ses propres capacités. Et cela aussi les acteurs de terrain l'observent.
