**Notes on Nursing** Florence Nightingale, 1860 The following notes are by no means intended as a rule of thought by which nurses can teach themselves to nurse still less as a manual to teach nurses to nurse They are meant simply to give hints for thought to women who have personal charge of the health of others Every woman or at least almost every woman in England has at one time or another of her life charge of the personal health of somebody whether child or invalid in other words every woman is a nurse Every day sanitary knowledge or the knowledge of nursing or in other words of how to put the constitution in such a state as that it will have no disease or that it can recover from disease takes a higher place It is recognized as the knowledge which every one ought to have distinct from medical knowledge which only a profession can have If then every woman must at some time or other of her life become a nurse i e have charge of somebody's health how immense and how valuable would be the produce of her united experience if every woman would think how to nurse I do not pretend to teach her how I ask her to teach herself and for this purpose I venture to give her some hints
