### **Upper Gastrointestinal Bleeding, An issue of Gastroenterology Clinics of North America** Ian M.

Gralnek, 2014-11-07 This issue of Gastroenterology Clinics of North America is all about acute upper GI bleeding and is divided into two distinct sections section I is devoted to nonvariceal upper GI bleeding and section II is devoted to variceal upper GI bleeding Acute nonvariceal upper GI bleeding may originate from the esophagus stomach or duodenum essentially anywhere proximal to the Ligament of Treitz In Section I Dr Gianluca Rotondano Hospital Maresca Torre del Greco Italy begins with a review of the epidemiology and diagnosis of acute nonvariceal upper GI bleeding We then turn to patient presentation risk stratification and how to initially medically manage these bleeding patients I am pleased to have one of our emergency medicine colleagues Dr Andrew Meltzer Department of Emergency Medicine George Washington University contribute this important article and provide a unique viewpoint from the emergency department where most of these patients initially present As we all know endoscopic hemostasis is the accepted standard of care for patients with acute

nonvariceal upper GI bleeding Moreover peptic ulcer bleeding is the most common nonvariceal cause of acute upper GI bleeding thus Drs Yidan Lu Yen I Chen and Alan Barkun from McGill University Montreal Canada provide an in depth review of the endoscopic management of peptic ulcer bleeding Drs Eric Tjwa I Lisanne Holster and Ernst Kuipers from the Erasmus Medical Center University Hospital Rotterdam The Netherlands review the endoscopic management of all other causes of acute nonvariceal upper GI bleeding and in addition Drs Louis Wong Kee Song and Michael Levy from the Mayo Clinic Rochester Minnesota discuss emerging endoscopic hemostasis treatments such as topical sprays and over the scope clipping devices Although endoscopic hemostasis is very highly effective there are unfortunately cases where bleeding is unable to be controlled or when significant rebleeding occurs that is not amenable to endoscopic therapy Therefore I have included two articles that provide insight into the question what if endoscopic hemostasis fails The first article written by Drs Philip Wai Yan Chiu and James Yun Wong Lau from Prince of Wales Hospital The Chinese University of Hong Kong focuses on tried and true surgical treatment options The second article by Dr Sujal Nanavati University of California at San Francisco Department of Radiology and Biomedical Imaging addresses the alternative treatment strategy of angiographic embolization which has now emerged as the often preferred salvage treatment strategy
