

Pre-Laboratory Questions

1. 25.000 grams of water at 45.00 °C was added to 25.00 grams of water at 20.30 °C in a coffee cup calorimeter. Upon mixing, the equilibrium temperature attained by the system was 31.40 °C. The specific heat of water is 4.184 J/g °C. What is the calorimeter constant for the coffee cup calorimeter?

2. 25.00 mL of 1.00 M HCl is mixed with 25.00 mL of 1.00 M LiOH in the calorimeter (same calorimeter from Question 1). The initial temperature of the HCl and LiOH solutions is 20.50 °C, and the equilibrium temperature of the reaction mixture is 38.50 °C. Assume the density and the specific heat of the solution is the same as for water, 1.00 g/mL and 4.184 J/g °C, respectively.

- a. Determine q_{solution} (heat absorbed or released by the reaction mixture)?

Gehlot,2024-07-12 The university grant commission UGC has proposed a certain defined new syllabus or curriculum for Indian universities according to NEP The changes are made in the syllabus or curriculum from time to time by educationalists or committees to bring uniformity to the education system In this book all the experiments are included with their principles and according to the syllabus of Indian universities The flow and constancy have been kept in this book so that students can learn and understand every corner of practical chemistry especially students in their first year who came from school education The book is written in simple systematic and easy language so students can grasp and learn the practical view of theories and principles Each chapter of this book starts with a brief introduction of theories and principles of experiments and then experimental procedures are explained The pre knowledge of any experiments helps to understand a deep sense of Theories The flow charts are given within the chapter to memorize some analytical procedures Writing the experiments in the record book is suggested at end of the chapter To boost the student s minds logical questions are given in separate chapters so students can prepare themselves for viva voce The method of solution preparation is also described in this book The list of required solutions and reagents of the laboratory are given for information For further knowledge some physical properties and a list of references and books are mentioned at end of the book This book is the result of experience and efforts in collecting compiling and editing content which makes it useful to students In it an effort has been made to select contents to meet the needs of students or demonstrators who cannot command the unlimited time available or who lack the facilities of library books or references which so often are not conveniently located at centers A worthy task had been accomplished by authors to guide and serve the information regarding experiments The students with this book may find systematic analysis practical procedures and a table containing valuable information in a single volume that has been especially computed for this purpose Every effort has been made to select the most reliable acceptable and feasible practical procedures with accuracy However we have effort to present work without any errors but there are opportunities that there may be some of them are present We expect from students and readers will bring our attention to such an error so that in our subsequent edition this error may solve and will not repeat While the principal aim of the book is for the UG student of chemistry it should also be of value to many people especially professional chemists physicists mineralogists biologists pharmacists engineers patent attorneys geologists agriculture chemists and chemists in the industries are often called upon to solve problems dealing with the properties of chemical products solution preparation analysis of chemicals We hope this book will be useful for the UG students of chemistry and that its resting place will be the desk of every student rather than on the bookshelf of any institute s library *Federal Evaluations* , Contains an inventory of evaluation reports produced by and for selected Federal agencies including GAO evaluation reports that relate to the programs of those agencies
