Experimental Games Patrick Jagoda, 2020-12-07 In our unprecedentedly networked world games have come to occupy an important space in many of our everyday lives Digital games alone engage an estimated 2.5 billion people worldwide as of

2020 and other forms of gaming such as board games role playing escape rooms and puzzles command an ever expanding audience At the same time gamification the application of game mechanics to traditionally nongame spheres such as personal health and fitness shopping habit tracking and more has imposed unprecedented levels of competition repetition and quantification on daily life Drawing from his own experience as a game designer Patrick Jagoda argues that games need not be synonymous with gamification He studies experimental games that intervene in the neoliberal project from the inside out examining a broad variety of mainstream and independent games including StarCraft Candy Crush Saga Stardew Valley Dys4ia Braid and Undertale Beyond a diagnosis of gamification Jagoda imagines ways that games can be experimental not only in the sense of problem solving but also the more nuanced notion of problem making that embraces the complexities of our digital present The result is a game changing book on the sociopolitical potential of this form of mass entertainment

The Turn to Provisionality in Contemporary Art Raphael Rubinstein,2023-01-12 In his influential essay Provisional Painting Raphael Rubinstein applied the term provisional to contemporary painters whose work looked intentionally casual dashed off tentative unfinished or self cancelling who appeared to have deliberately turned away from strong painting for something that seemed to constantly risk failure or inconsequence In this collection of essays Rubinstein expands the scope of his original article by surveying the historical and philosophical underpinnings of provisionality in recent visual art as well as examining the works of individual artists in detail He also engages crucial texts by Samuel Beckett and philosopher Gianni Vattimo Re examining several decades of painting practices Rubinstein argues that provisionality in all its many forms has been both a foundational element in the history of modern art and the encapsulation of an attitude that is profoundly contemporary

Soldo, 2023-12-18. Mankind's constant struggle with physical as well as mental weaknesses is omnipresent in ancient literature. Misconduct, wrongdoing, failure and experiences of contingency are anthropological phenomena. Ancient ethics, epistemology and natural philosophy have developed different theoretical approaches and guidelines on how to act and how to overcome all kinds of problems. Christian theology on the other hand has explained moral failure as a symptom of original sin, comparing decline and destruction to a burden from which mankind is relieved only at the end. The contributions explore how ancient philosophical texts both pagan and Christian explain, conceptualize and integrate the myriad manifestations of human fallibility into the different philosophical schools. The focus is on anthropological, ontological and theological concepts that analyse and reflect human fallibility as well as on the textual and linguistic representation of the phenomenon in ancient literature. Several contributions in the volume explore literary texts that discuss or illustrate the philosophical dimension of fallibility, such as satire or tragedy, often exaggerated depiction of human weakness. **Working with High-Risk**
