Financing Micro Health Insurance: Theory, Methods And Evidence David M Dror, 2018-12-27 Healthcare for all at affordable prices is still a major but universally elusive goal Everyone spends money on healthcare and it is the most impoverishing consumption item Thus most governments and the United Nations promote Universal Health Coverage each country's unique blend of tools for healthcare financing including taxes subsidies and market controls Most people in low and middle income countries LMICs have no health insurance of any kind And most LMIC governments lack the political will information or resources to require their citizens to buy health insurance themselves or to subsidize insurance for all who cannot afford the price This book deals with financing voluntary and contributory health insurance for resource poor and rural groups in LMICs This book addresses three issues The first is how to catalyse demand for health insurance and develop

insurance literacy among the largely illiterate and innumerate target population using training programs to build an enabling consensus allowing locals to create and administer such schemes The second involves the process of developing simplified methods for risk assessment which can help to underwrite risks price the micro health insurance schemes and ensure proper implementation The third issue is formulating a compelling business case which would make this health insurance affordable financially sustainable and operationally scalable This book develops insurance education and financial literacy for students of economics business administration insurance development studies and social work to prepare them for practical work as implementers policymakers or evaluators A supplementary section for teachers and students includes comprehension questions

Undocumented and Unaccompanied Cecilia Menjívar,Krista Perreira,2021-11-29 This book focuses on the migration of undocumented minors arriving recently to the United States and the European Union flows that are often labeled undocumented illegal or irregular and due to their sudden increase they have been described in the media policy circles and scholarly work as a surge or a crisis Leading scholars examine the intricacies of the contexts that these minors encounter in the localities where they arrive including the legal and ethical frameworks for protecting unaccompanied minors governmental decisions about the best interests of the children these minors expressions of their own best interests or agency as they navigate immigration and social service systems conditions in detention centers and the health and social service needs in receiving communities Though definitions and techniques for counting unaccompanied migrant minors differ between the U S and the EU this book underscores the immigrant minors common vulnerabilities and strategies they adopt to protect themselves and improve their circumstances At the same time contributors to the volume highlight common challenges that both European and U S governments face as they develop policy strategies and legal mechanisms to attempt to balance the best interests of these children with national interests of the countries in which they settle The chapters in this book were originally published as a special issue of the Journal of Ethnic and Migration Studies

Rationing and Resource Allocation in Healthcare Ezekiel Emanuel,Harald Schmidt,Andrew Steinmetz,2018-05-10 Budgets of governments and private insurances are limited Not all drugs and services that appear beneficial to patients or physicians can be covered Is there a core set of benefits that everyone should be entitled to If so how should this set be determined Are fair decisions just impossible if we know from the outset that not all needs can be met While early work in bioethics has focused on clinical issues and a narrow set of principles in recent years there has been a marked shift towards addressing broader population level issues requiring consideration of more demanding theories in philosophy political science and economics At the heart of bioethics new orientation is the goal of clarity on a complex set of questions in rationing and resource allocation Rationing and Resource Allocation in Healthcare Essential Readings provides key excerpts from seminal and pertinent texts and case studies about these topics contextualized by original introductions The volume is divided into three broad sections Conceptual Distinctions and Ethical Theory Rationing and Resource Allocation Containing the most

important and classic articles surrounding the theoretical and practical issues related to rationing and how to allocate scarce medical resources this collection aims to assist and inform those who wish to be a part of bioethics 21st century shift including practitioners and policy makers and students and scholars in the health sciences philosophy law and medical ethics

Bioethics Reenvisioned Nancy M. P. King, Gail E. Henderson, Larry R. Churchill, 2022-11-29 Bioethics needs an expanded moral vision Born in the ferment of the 1970s the field responded to rapid developments in biomedical technology and injustices in clinical care and research Since then bioethics has predominantly focused on respect for autonomy beneficence and nonmaleficence and the zero sum lifeboat ethics of distributive justice applying these principles almost exclusively within the walls of medical institutions It is now time for bioethics to take full account of the problems of health disparities and structural injustice that are made newly urgent by the COVID 19 pandemic and the effects of climate change This book shows why and how the field must embrace a broader and more meaningful view of justice principally by incorporating the tools and insights of the social sciences epidemiology and public health Nancy M P King Gail E Henderson and Larry R Churchill make the case for a more social understanding and application of justice a deeper humility in assessing expertise in bioethics consulting a broader and more relevant research agenda and greater appreciation of the profound health implications of global warming

The Ethics of Health Care Rationing Greg Bogner, Iwao Hirose, 2022-03-16 The rationing of health care is universal and inevitable taking place in both poor and affluent countries in publicly funded and private health care systems Someone must budget for as well as dispense health care whilst aging populations severely stretch the availability of resources The Ethics of Health Care Rationing is a clear timely and much needed introduction to this important topic Substantially revised and updated this second edition includes new chapters on disability discrimination and age discrimination and on the price of drugs and medical therapies Beginning with a helpful overview of why rationing is an ethical problem the authors examine the following key topics What sort of distributive principles should we rely on when thinking about health care rationing What is the relation between ethics and cost effectiveness in health care How should we think about controversies surrounding discrimination over disability and age How should we approach controversies surrounding rationing and the price of pharmaceutical drugs and medical therapies Should patients be held responsible for their health Why does the debate on responsibility for health lead to issues about socioeconomic status and social inequality Throughout the book examples from the United States the United Kingdom and other countries are used to illustrate the ethical issues at stake Additional features such as chapter summaries annotated further reading and discussion questions have also been updated making this an ideal starting point for students new to the subject not only in philosophy but also in closely related fields such as politics health economics public health medicine nursing and social work

ICU Resource Allocation in the New Millennium David Crippen, 2012-09-14 Intensive care medicine is one of the fastest growing services provided by hospitals and perhaps one of the most expensive Yet in response to the global financial crisis of the last few years healthcare funding is slowing or decreasing throughout the world How we manage health care resources in the intensive care unit ICU now and in a future that promises only greater cost constraints is the subject of this book the third in

an informal series of volumes providing a global perspective on difficult issues arising in the ICU Taking 12 developed countries as their focus leading experts provide a country by country analysis of current ICU resource allocation A second group of experts use the chapters as a departure point to analyze current ICU resource allocation at the level of the global medical village The process is repeated but with an eye toward the future first country by country then at the global level that takes into account initiatives and reforms now underway A fictional healthcare plan the Fair Equitable Healthcare Plan is put forth to address weaknesses in existing approaches and healthcare experts and ethicists are invited to respond to its often provocative provisions Itself structured as a dialogue the book is an excellent way to start or to continue serious discussion about the allocation of ICU healthcare resources now and in the years ahead

Intensive Care Medicine in 10 Years Mitchell P. Fink, Peter M. Suter, William J. Sibbald, 2006-10-25 This book identifies trends in critical care medicine that will form the basis for practice over the next ten years Predicting the future is always risky Nevertheless the ideas articulated in this book are likely to serve as a road map for intensivists hospital administrators and governmental leaders interested in healthcare as they seek to improve the quality and efficiency of hospital based services

Resolving Ethical Dilemmas Bernard Lo, 2009-01-01 This timely resource offers clinicians expert guidance in approaching a wide range of ethical dilemmas and developing an action plan This edition includes a new chapter on ethical issues in cross cultural medicine and new material on conscientious objection by physicians in reproductive health and other areas
