identities by an anxious ruling elite has laid the foundations for mass violence and how in Myanmar's case some of the most respected and articulate voices for democracy have turned on the Muslim population at a time when the majority of citizens are beginning to experience freedoms unseen for half a century *ECGBL2013-Proceedings of the 6th European Conference on Games Based Learning* Patrick Felicia,2012 *Advances in Shipping Data Analysis and Modeling* César Ducruet,2017-11-06 Shipping flows maritime footprints remain underexplored in the existing literature despite the crucial importance of freight transport for global trade and economic development Additionally decision makers lack a comprehensive view on how shipping flows can be measured analyzed and mapped in order to support their policies and strategies This interdisciplinary volume drawing on an international cast list of experts explores a number of crucial issues in shipping data estimation construction collection mining analysis visualization and mapping *Advances in Shipping Data Analysis and Modeling* delivers several key messages First that in a world of just in time delivery and rapid freight transit it is important to bear in mind the long term roots of current trends as well as foreseeable future developments because shipping patterns exhibit recurrent if not cyclical and path dependent dynamics Second shipping flows are currently often understood at the micro level of intra urban logistics delivery and at the national level using commodity flow analyses but this volume emphasizes the need to expand the scale of analysis by offering new evidence on the changing distribution of global and international shipping flows based on actual data Third that this multidisciplinary approach to shipping flows can shed important light on crucial issues that go beyond shipping itself including climate change urban development technological change commodity specialization digital humanities navigation patterns international trade and regional growth Edited by experts in their field this volume is of upmost importance to those who study industrial economics shipping industries and economic and transport geography **Minerals Yearbook** Mines Bureau,Geological Survey,Interior Department,2018-04-19 The region of Europe and Central Eurasia defined in this volume encompasses territory that extends from the Atlantic Coast of Europe to the Pacific Coast of the Russian Federation It includes the British Isles Iceland and Greenland a self governing part of the Kingdom of Denmark Included are mineral commodity outlook tables plus global overview research for particularly commodities within a specific regions countries are presented throughout the text Manufacturers of these metals and commodities along with trade brokers that may specialize in imports and exports political scientists and economists may also be interested in this volume Students pursuing research on specific metals and mineral commodities for world economy courses may be interested in this volume *Companion to Environmental Studies* Noel Castree,Mike Hulme,James D. characterised by practices of receptive generosity rapprochement between religious and secular ethics and a hopeful re enchantment and re shaping of desire towards common life The authors highlight the contested formation of ethical subjectivity under neoliberalism and the emergence of postsecularity within this process as an ethically attuned politics which changes relations between religion and secularity and animates novel hopeful imaginations subjectivities and praxes as alternatives to neoliberal norms The spaces and subjectivities of emergent postsecularity are examined through a series of innovative case studies including food banks drug and alcohol treatment refugee humanitarian activism in Calais homeless participatory art projects community responses to the Christchurch earthquakes in New Zealand amongst others The book also traces the global conditions for postsecularity beyond the Western and predominantly Christian secular nexus of engagement This is a valuable resource for students in several academic disciplines including geography sociology politics religious studies international development and anthropology It will be of great interest to secular and faith based practitioners working in religion spirituality politics or more widely in public policy urban planning and community development
