Idea Engineering La Verne Abe Harris, 2014-01-03. Engineers and technologists often operate from a worldview of ones and zeros. The mission of this book is to interject the colorful world of creative thinking to help engineers and technologists learn to think and work differently. Thus idea engineering becomes the driving force transforming engineers and technologists into innovators and entrepreneurs using case studies and anecdotes from first hand experience. The material in this book is organized to take the reader through basic concepts and techniques of creative thinking and innovation to better solve engineering and technological challenges. It provides an overall understanding of who, what, why, when and how idea engineering can transform an individual and a company to formulate and apply the best possibilities. The target audience is university level students and practitioners especially upper division undergraduates and graduate students in engineering education, industrial engineering, engineering technology, science and technology and then engineering practitioners from an engineering technology or science background. It can be purchased individually as a text, professional, trade or reference title.

or accessed within a collection libraries and professional organizations would buy In addition the material in this book can supplement coursework in business communication management and applied creative arts As a core or supplemental text it would make a great foundation for a one credit course or a part of any three credit capstone design course or seminar stressing creative thinking and innovation It would also be a good overview for any layman interested in learning about creative thinking and innovation
