

RESEARCH PROPOSAL TEMPLATE

When preparing an application for entry into a research higher degree program it is necessary to supply a clear statement describing the proposed area of research (a research proposal). Consultation with a faculty or school academic staff member in the research area of interest is recommended prior to submission of an application. Liaising with an academic allows you to frame the proposal to align with established disciplines and areas of supervisor capacity.

You must write your own research proposal and reference accordingly. The exception is when your potential supervisor finalises the research proposal with you, for a specific research project that has already been defined. Please visit the University's Academic Integrity pages and policy

General

- Length: From one to three pages is often suitable, depending on the area of research.
- Detail: The following outline may be used as a guide. You should consider each of the areas that will be relevant to your research.
- Minimum: The recommended minimum requirements are identified with an asterisk (*).

Research topic/title*

An initial working title should be provided and should describe the content and direction of your project. For example: *A template for assisting research students in the development of a research proposal.*

PROJECT DESCRIPTION

Background

What is already known or unknown? Set the scene.

Aims*

What do you want to know, prove, demonstrate, analyse, test, investigate or examine? List your project aims in a logical sequence. For example: The aim of this project is to:

- Provide an outline of a research proposal
- Enable a prospective student to prepare a research proposal

Methodology*

How do you anticipate you will achieve these aims?
What do you need? (specify any special equipment, software or material) Can you access necessary data or expertise?
Do you require particular resources?
Are there barriers or pitfalls?
Does the project involve human ethics, animal ethics or safety implications?
Is travel or fieldwork required? If so, where to, how long and at what intervals?

Expected outcomes, significance or rationale

Why is it important?
What do you expect it will deliver?
What are the expected outcomes?
Establish the importance of your project by highlighting its originality or why it is worth pursuing. Highlight the benefits, positive expected outcomes or innovative applications of knowledge.

Timetable*

Indicate the timeframe for each broad stage considering literature surveys, data collection, production, modelling, review, analysis, testing, reporting, chapter and thesis writing, and thesis submission date.

How to Write and Publish a Scientific Paper Barbara Gastel,Robert A. Day,2022-06-30 Thoroughly updated throughout this classic practical text on how to write and publish a scientific paper takes its own advice to be as clear and simple as possible The purpose of scientific writing according to Barbara Gastel and Robert A Day is to communicate new scientific findings Science is simply too important to be communicated in anything other than words of certain meaning This clear beautifully written and often funny text is a must have for anyone who needs to communicate scientific information whether they re writing for a professor other scientists or the general public The thoughtfully revised 9th edition retains the most important material including preparing text and graphics publishing papers and other types of writing and plenty of information on writing style while adding up to date advice on copyright presenting online identifying authors creating visual abstracts and writing in English as a non native language A set of valuable appendixes provide ready reference including words and expressions to avoid SI prefixes a list of helpful websites and a glossary Students and working scientists will want to keep *How to Write and Publish a Scientific Paper* at their desks and refer to it at every stage of writing and publication

Essentials of Scientific Writing Joseph Mugah,2016-12-13 *Essentials of Scientific Writing How to Write Effective Titles and Abstracts for Research Papers and Proposals* is a belated entrant into a vast and crucially important area with scarce reference materials This scarcity manifested itself as I searched what I had expected would be useful source materials for the present book I skimmed through many textbooks on scientific writing and editing articles on the Internet and notes from courses on scientific writing They all turned out to be manifestly wanting in both depth and scope None extended beyond two pages and most were hardly a page long so they were largely useless for my purposes To the authors knowledge few published books treat the subjects of Titles and Abstracts in the kind of detail presented in this book Accordingly in developing the book the author hoped to fill a void in the crucial area of facilitating sharing of knowledge and information from research work It is my hope that everyone writing scientific work will endeavor to find space for the book on their shelves and will place it within arms length whenever they are writing or editing the title or abstract

How to Write and Publish a Scientific Paper Robert A. Day,Barbara Gastel,2012-06-07 An essential guide providing beginning scientists and experienced researchers with practical advice on writing about their work and getting published

Elements of Research

Design Titus Hjelm, 2024-03-19 Titus Hjelm's guide to designing a research project is an invaluable primer for students embarking on dissertations theses and other research projects. The book goes beyond simple introductions to methods to help researchers identify their priorities and goals from the outset. A pocket supervisor for researchers, it shows how projects are not limited by conventional and siloed steps of research but are instead holistic processes. The book succinctly sets out the best approaches to each element of research including questions, literature reviews, data collection and analysis, and covers other important aspects including ethics. It builds into a toolkit that equips readers with the knowledge and confidence to conduct more effective research and ultimately achieve better outcomes and satisfaction. *A Systematic Guide to Write a*

How to Write a Research Paper: A Guide Book for Neophyte Students Dr. Rashmee Yadav, 2023-02-14 **ABOUT THE BOOK** The book *How to Write a Research Paper* Guide book for neophyte students composed by three youngsters Dr. Rashmee Yadav, Dr. Brij Vikash Singh, and Dr. Mithesh Verma is a fantastic effort in this direction. They have covered almost all the areas of research paper writing process and how to write a research paper etc. The book is based on the research paper writing process. The author's main focus on this book is *How to Write a Research Paper Guide Book for the Neophyte Students*. This book is helpful to students writing research paper in proper way because plenty of research papers are written every year. But in many of them, research methodology aspect is not given a considerable attention, and because of which the research papers end up in just being endless words containing stories leading to less or no sense. It should be noted that the quality in research articles comes from the extensive planning and in-depth research before starting writing them. This is true even for management research papers. Writing a research paper analyzes a perspective or argues a point. Regardless of the type of research paper the researcher is writing, the researcher should present his own thinking backed up by others' ideas and information. Research paper as a result of the research in the teaching of writing discussions with colleagues and own experiences. We have developed a detailed approach to writing research papers, and the approach is presented here. Instead of focusing on one research paper, we have focused on the process of research writing through a series of shorter writing

exercises Students begin by having to carefully think about a topic of research and by developing a working idea They then write a series of shorter essays that explore that topic All along the way students are continuing to research and revise their working proposal so that by the end of the term their thinking about their original topic of research has evolved This b

Sepasgozar,2024-09-09 Academic proposals have clear communication and standardized formatting in most fields while creative presentations might be acceptable in design or artistic fields Imagine your research proposal including a novel concept buried under flashy fonts diverse colors and confusing graphics resulting in losing the key message in a visual cacophony This chapter guides you through crafting a proposal with clear information that resonates with scientific norms ensuring clarity and coherence from the cover to the conclusion We ll explore font choices graphic elements and formatting with a clear structure to elevate your message without distracting from its core excellence A plain well structured research proposal should highlight the research rigor not the visual effects **Student Research and Report Writing** Gabe T.

Wang,Keumjae Park,2015-11-25 This is an invaluable concise all in one guide for carrying out student research and writing a paper adaptable to course use and suitable for use by students independently it successfully guides students along every step of the way Allows students to better manage their research projects Exercises and worksheets break down the research process into small steps and walk students through each stage of the research project Offers real world and lively examples that are attractive and relevant to students Based on twenty years of experience in teaching research techniques to students in a way that avoids the methodology overkill from encyclopaedic and intimidating textbooks Accompanying website includes powerpoint lecture slides for instructors and helpful links to video resources for student Visit www.wiley.com/go/wangresearchreportwriting *How to Get Published and Win Research Funding* Abby Day,2023-06-19 Most journal articles and research proposals are rejected That represents a waste of everyone s time energy and spirit especially now when more than ever academic careers are precarious In this practical book Professor Abby Day addresses these two inter related and most challenging areas for academics and researchers in their professional careers how to secure research funding and how to get research published Reviewers unpaid and often unappreciated are over stretched with their regular academic jobs and increasingly reluctant to spend time reading poorly constructed papers or proposals As fewer reviewers are available the waiting time for a decision increases Everyone loses It doesn t have to be like that Professor Day s ground breaking strategy covers both publishing and funding challenges in similar yet distinct ways Lack of time Conflicting priorities No idea where to start or what matters most This book explains how to overcome these and other common obstacles to successful publication and funding For the first time one book covers both activities with practical guidance for setting your strategy and purpose identifying the right publisher or funder and understanding your audience and the key criteria for success as well as helpful advice for writing and managing the challenges of an academic career This book draws on the first and second editions of two international bestsellers *How to Get Research Published in Journals* and *Winning Research Funding* Based on original research with editors funders and successful academics plus two decades of running international workshops on

publishing and funding Professor Day has now updated and merged these two critically acclaimed texts This book is essential reading for graduate students and early career faculty members who will gain new and effective insights and strategies to secure funding and publication opportunities to help develop their academic careers **Reading Empirical Research Studies** John R. Hayes, Richard E. Young, Michele L. Matchett, Maggie McCaffrey, Cynthia Cochran, 2020-10-07 For the most part those who teach writing and administer writing programs do not conduct research on writing Perhaps more significantly they do not often read the research done by others because effective reading of articles on empirical research requires special knowledge and abilities By and large those responsible for maintaining and improving writing instruction cannot without further training access work that could help them carry out their responsibilities more effectively This book is designed as a text in graduate programs that offer instruction in rhetoric and composition Its primary educational purposes are to provide models and critical methods designed to improve the reading of scientific discourse to provide models of effective research designs and projects appropriate to those learning to do empirical research in rhetoric Aiming to cultivate new attitudes toward empirical research this volume encourages an appreciation of the rhetorical tradition that informs the production and critical reading of empirical studies The book should also reinforce a slowly growing realization in English studies that empirical methods are not inherently alien to the humanities rather that methods extend the power of humanist researchers trying to solve the problems of their discipline
