writing becomes a way of forgetting In *Slips of the Mind* poet and critic Jennifer Soong turns away from forgetting's long standing associations with suppression privation and error to argue that the absence or failure of memory has often functioned as a generative creative principle Exploring forgetting not as the mere rejection of a literary past or a form of negative poetics Soong puts to the test its very aesthetic meaning What new structures forms of desires styles and long and short feelings do lapses in time allow What is oblivion's relationship to composition And how does the twentieth century poet come to figure as the quintessential embodiment of such questions Soong uncovers forgetting's influence on Gertrude Stein Lyn Hejinian Tan Lin Harryette Mullen Lissa Wolsak and New York School poets John Ashbery James Schuyler Bernadette Mayer and Ted Berrigan among others She reveals that forgetting's shapeshifting produces differences in poetic genre interest and degrees of intentionality and that such malleability is part of forgetting's nature Most provocatively Soong shows how losing track of things leaving them behind or finding them already gone resists overdetermination and causality in the name of surprise as poets leverage forgetting in order to replace identity with style *Slips of the Mind* is the kind of literary criticism that will reward all readers of modern and contemporary poetry

Law and Authority under the Guise of the Good Veronica Rodriguez-Blanco, 2014-12-01 The received view on the nature of legal authority contains the idea that a sound account of legitimate authority will explain how a legal authority has a right to command and the addressee a duty to obey The received view fails to explain however how legal authority truly operates upon human beings as rational creatures with specific psychological makeups This book takes a bottom up approach beginning at the microscopic level of

agency and practical reason and leading to the justificatory framework of authority The book argues that an understanding of the nature of legal normativity involves an understanding of the nature and structure of practical reason in the context of the law and advances the idea that legal authority and normativity are intertwined This point can be summarised thus if we are able to understand both how the agent exercises his or her practical reason under legal directives and commands and how the agent engages his or her practical reason by following legal rules grounded on reasons for actions as good making characteristics then we can fully grasp the nature of legal authority and legal normativity Using the philosophies of action enshrined in the works of Elisabeth Anscombe Aristotle and Thomas Aquinas the study explains practical reason as diachronic future directed intention in action and argues that this conception illuminates the structure of practical reason of the legal rules addressees The account is comprehensive and enables us to distinguish authoritative and normative legal rules in just and good legal systems from apparent authoritative and normative legal rules of evil legal systems At the heart of the book is the methodological view of a practical turn to elucidate the nature of legal normativity and authority
