

Lab Report Format

Date:

Name:

Title

A whole page for a title is unnecessary and quite wasteful of paper. Put the title of your lab experiment at the top. Include your name, your group members' names, teacher's name, course and the date.

Purpose

Answer in a sentence or two, "what is the purpose of this experiment?"

Question

Write down a testable question, e.g. "How does string length affect the period of a pendulum?" or "What is the acceleration due to gravity in my school?" The general format is "how does *independent variable* affect *dependent variable*?"

Hypothesis

Use the format "If...then...because". E.g. "If the length of the string increases, then the period of the pendulum will increase because the object has to travel farther".

Experimental Design

What are you going to do in the experiment? Explain briefly, in a few sentences, what is the generalized procedure. State the independent, dependent and controlled variables.

Materials

List any and all materials you will need for the experiment (NOT the materials you needed to build your launcher). Use the proper name and include the number if you need multiples.

Scientific Drawing

Include a one-page scientific drawing of your apparatus that includes your projectile launcher, measuring devices, etc.

Composing A Care of the Self David Lee Carlson, James Albright, 2012-12-06 What do Germ Theory self psychology the entrepreneur and the Bertillon Card have in common? They comprise a part of the historical dispositif for the emergence of the writing portfolio. This riveting Foucaultian inspired genealogy travels through the history of medicine criminality psychology political economics to reveal the epistemologies and practices of power knowledge of the contemporary portfolio. In so doing it challenges previous held beliefs about the germination of the secondary school prevailing views of the dawning of secondary English as a discipline and most important the costs and effects of progressivist writing pedagogies and assessment instruments. Carlson Albright offer fresh and far ranging examinations of the rise and development of composition studies and assessment practices in U S secondary schools thereby challenging major English education scholars long held interpretations of such. *Composing a Care of the Self: A Critical History of Writing Assessment in Secondary English Education* posits for example an elucidation of the history of writing assessment that I believe is most compelling and original particularly in its analysis of historically dominant medical discourses and metaphors of the late 19th century and their influences on secondary English educators. Further the authors inspired by Foucault's uses of genealogy as means to expose practices and rationalities of power knowledge dynamics and their relations to matters of governance dramatically advance theoretical orientations within the field of English Education. They do so through their intricate weaving of Foucauldian theoretical perspectives into analyses of crucial and yet often taken for granted forms and functions of composition studies and writing assessments in the secondary English classroom. As such this book is a remarkable achievement.

IN COMPOSING A CARE OF THE SELF: A CRITICAL HISTORY OF WRITING ASSESSMENT IN SECONDARY ENGLISH EDUCATION David Carlson and James Albright problematized secondary school assessment practices in the late nineteenth century and provide a fascinating genealogical study of English education. Together and under the mantle of Foucaultian genealogy they explore the relationships among the body health and secondary education exploring how epistemology in medicine spread to educational discourse. This is a highly readable account and one that disturbs the standard histories. It is a highly recommended text for all those interested in the history of English studies and writing assessment.

Worth Writing About Jake Wizner,2023-10-10

Who am I This is the question that many adolescents ask during the turbulent middle and high school years In *Worth Writing About Exploring Memoir with Adolescents* Jake Wizner addresses how searching for the answer to this question leads his students to reflection to reading and ultimately to deeper more meaningful writing Wizner a 20 year teaching veteran believes that a well designed memoir unit not only aligns with the Common Core State Standards but also forges community in the classroom encourages kids to read nonfiction and works wonders with students who struggle with their writing sor with their lives *Worth Writing About* addresses the most common challenges teachers face when teaching memoir writing How do you help students who say that nothing interesting has happened in their lives How do you help students balance what is meaningful with what is too personal to share How do you help students overcome the I don t remember syndrome Wizner delves into the craft of writing from using mentor texts to crafting leads and memorable endings He uses student models from his own classroom to show the deep important work his students produce during the memoir unit By writing about themselves and how they view the world around them students discover more about themselves and how they want to move forward in the future

Tracing the Impact of First-Year Writing Laura Wilder,2024-11-15 *Tracing the Impact of First Year Writing* presents the results of a large scale longitudinal study of college writers that explores the impact of a required first year writing course with a comparative approach not previously available Over five years Laura Wilder conducted 143 interviews with and collected 774 pages of writing from 58 students half of whom had taken a new first year writing course and half who had not Wilder found that while in many ways the experiences of both groups are comparable demonstrating how students receive valuable educations in rhetoric and writing from a variety of sources beyond a first year writing course students who took the first year writing course were much more likely to identify as writers This identification supported students use of writing in powerfully generative and knowledge building ways that they carried with them long after the course into other appropriate contexts In contrast to previous longitudinal studies of college writers undertaken at institutions with high prestige and resources *Tracing the Impact of First Year Writing* explores the role of writing at a regional public university and documents how students experiences with writing can be highly divergent across the curriculum and unequal across campuses Additionally this book includes the voices of students who do not identify as capable writers and have strongly negative emotional reactions to writing and writing instruction and adds empirical support to innovative calls in the field to transform the first year writing course into one that inspires students to reflectively consider writing itself

The Idea of a Writing Laboratory Neal Lerner,2009-07-09 *The Idea of a Writing Laboratory* is a book about possibilities about teaching and learning to write in ways that can transform both teachers and students Author Neal Lerner explores higher education s rich history of writing instruction in classrooms writing centers and science laboratories By tracing the roots of writing and science educators recognition that the method of the lab hands on student activity is essential to learning Lerner offers the hope that the idea of a writing laboratory will be fully realized more than a century

after both fields began the experiment Beginning in the late nineteenth century writing instructors and science teachers recognized that mass instruction was inadequate for a burgeoning non traditional student population and that experimental or laboratory methods could prove to be more effective Lerner traces the history of writing instruction via laboratory methods and examines its successes and failures through case studies of individual programs and larger reform initiatives Contrasting the University of Minnesota General College Writing Laboratory with the Dartmouth College Writing Clinic for example Lerner offers a cautionary tale of the fine line between experimenting with teaching students to write and curing the students of the disease of bad writing The history of writing within science education also wends its way through Lerner s engaging work presenting the pedagogical origins of laboratory methods to offer educators in science in addition to those in writing studies possibilities for long sought after reform The Idea of a Writing Laboratory compels readers and writers to don those white coats and safety glasses and discover what works and asserts that teaching writing as an experiment in what is possible as a way of offering meaning making opportunities for students no matter the subject matter is an endeavor worth the struggle Disciplinary Literacy Inquiry & Instruction, Second Edition Jacy Ippolito,Christina L.
