*Conquest of Body* Polona Tratnik,2017-05-26 This book reflects on the phenomenon of biotechnology and how it affects the body and discusses a number of related issues including visualization mediation and epistemology The author offers a compelling thesis arguing that the exploration of the human body has one ultimate aim to gain knowledge of it and to conquer it Exploration of body has an intrinsic link to power since knowledge is constitutive for the power over the body Ultimately the conquest of body means the power to intervene into life processes The book breaks new ground with its study of body visualizations from the Renaissance drawings to the medical imaging In particular it investigates their complex mediality It also considers the extension and the reach of biopower that is now possible thanks to a wide range of engineering applications The author originally questions the research approach by rethinking the relationship between mental and sensual examination She takes into consideration the epistemological problem of the two modes of exploration obtaining knowledge from empirical exploration and projecting that knowledge to the object of exploration **Comparative Skeletal Anatomy** Bradley J. Adams,Pamela J. Crabtree,2009-12-13 Forensic scientists working with human skeletal remains must be able to differentiate between human and non human bones *Comparative Skeletal Anatomy A Photographic Atlas for Medical Examiners Coroners Forensic Anthropologists and Archaeologists* fills a void in the literature by providing a comprehensive photographic guide of both human and non human bones that is useful to those working in the fields of archaeology or the forensic sciences This volume is a photographic atlas of common animal bones and is the first to focus comparatively on both human and animal osteology Throughout this groundbreaking text animal bones are photographed alongside the corresponding human bone allowing the reader to observe size and shape variations The goal of this guide is to

help experienced archaeologists and forensic scientists distinguish human remains from common animal species including horses cows goats rabbits chickens ducks sheep and pigs among others Comprehensive and timely Comparative Skeletal Anatomy A Photographic Atlas for Medical Examiners Coroners Forensic Anthropologists and Archaeologists is sure to become an essential reference for all forensic scientists and archeologists working with human skeletal remains Ritual, Belief and the Dead in Early Modern Britain and Ireland Sarah Tarlow, 2010-11-22 Drawing on archaeological historical theological scientific and folkloric sources Sarah Tarlow's interdisciplinary study examines belief as it relates to the dead body in early modern Britain and Ireland From the theological discussion of bodily resurrection to the folkloric use of body parts as remedies and from the judicial punishment of the corpse to the ceremonial interment of the social elite this book discusses how seemingly incompatible beliefs about the dead body existed in parallel through this tumultuous period This study which is the first to incorporate archaeological evidence of early modern death and burial from across Britain and Ireland addresses new questions about the materiality of death what the dead body means and how its physical substance could be attributed with sentience and even agency It provides a sophisticated original interpretive framework for the growing quantities of archaeological and historical evidence about mortuary beliefs and practices in early modernity
