Deerland Al Cambronne, 2013-03-21 In 1942 America fell in love with Bambi. But now that love affair has turned sour. Behind the unassuming grace and majesty of America's whitetail deer is the laundry list of human health, social, and ecological problems that they cause. They destroy crops, threaten motorists, and spread Lyme disease all across the United States. In *Deerland* Al Cambronne travels across the country speaking to everybody from frustrated farmers to camo-clad hunters to humble deer enthusiasts in order to get a better grasp of the whitetail situation. He discovers that the politics surrounding deer run surprisingly deep, with a burgeoning hunting infrastructure supported by state government and community businesses. Cambronne examines our history with the whitetail, pinpoints where our ecological problems began, and outlines the environmental disasters we can expect if our deer population continues to go unchecked. With over 30 million whitetail in the US, *Deerland* is a timely and insightful look at the ecological destruction being wrecked by this innocent and adored species. Cambronne asks tough questions about our environment's future and makes the impact this invasion has on our own backyards.

The Mindful Carnivore Tovar Cerulli, 2013-03-13 A vegan turned hunter reignites the connection between humans and our food sources and continues the dialog begun by Michael Pollan and Barbara Kingsolver. While still in high school Tovar Cerulli experimented with vegetarianism and by the age of twenty he was a vegan. Ten years later in the face of declining health he would find himself picking up a rifle and heading into the woods. Through his personal quest Tovar Cerulli bridges disparate worldviews and questions moral certainties, challenging both the behavior of many hunters and the illusion of blamelessness maintained by many vegetarians. In this time of intensifying concern over ecological degradation, how do we make peace with the fact that even in growing organic vegetables, life is sustained by death? Drawing on personal anecdotes, philosophy, history, and religion, Cerulli shows how America's overly sanitized habits of consumption and disconnection with our food have resulted in so many of the health and environmental crises we now face.
