Documenting Aftermath Megan Finn, 2018-10-16 An examination of how changing public information infrastructures shaped people's experience of earthquakes in Northern California in 1868 1906 and 1989 When an earthquake happens in California today residents may look to the United States Geological Survey for online maps that show the quake's epicenter turn to Twitter for government bulletins and the latest news check Facebook for updates from friends and family and count on help from the Federal Emergency Management Agency FEMA One hundred and fifty years ago however FEMA and other government agencies did not exist and information came by telegraph and newspaper In Documenting Aftermath Megan Finn explores changing public information infrastructures and how they shaped people's experience of disaster examining postearthquake information and communication practices in three Northern California earthquakes the 1868 Hayward Fault earthquake the 1906 San Francisco earthquake and fire and the 1989 Loma Prieta earthquake She then analyzes the institutions policies and technologies that shape today's postdisaster information landscape Finn argues that information orders complex constellations of institutions technologies and practices influence how we act in experience and document events What Finn terms event epistemologies constituted both by historical documents and by researchers who study them explain how information orders facilitate particular possibilities for knowledge After the 1868 earthquake the Chamber of Commerce telegraphed reassurances to out of state investors while local newspapers ran sensational earthquake narratives in 1906 families and institutions used innovative techniques for locating people and in 1989 government institutions and the media developed a symbiotic relationship in information dissemination Today government disaster response plans and new media platforms imagine different sources of informational authority yet work together shaping disaster narratives

Cajun Literature and Cajun Collective Memory Mathilde Köstler, 2022-12-19 How does Cajun literature emerging in the 1980s represent the dynamic processes of remembering in Cajun culture Known for its hybrid constitution and deeply ingrained oral traditions Cajun culture provides an ideal testing ground for investigating the collective memory of a group In particular francophone and anglophone Cajun texts by such writers as Jean Arceneaux Tim Gautreaux Jeanne Castille Zachary Richard Ron Thibodeaux Darrell Bourque and Kirby Jambon reveal not only a shift from an oral to a written tradition They also show

hybrid perspectives on the Cajun collective memory Based on recurring references to place the texts also reflect on the Acadian past and reveal the innate ability of the Cajuns to adapt through repeated intertextual references The Cajun collective memory is thus defined by a transnational outlook a transversality cutting across various ethnic heritages to establish and legitimize a collective identity both amid the linguistic and cultural diversity in Louisiana and in the face of American mainstream culture Cajun Literature and Cajun Collective Memory represents the first analysis of the mnemonic strategies Cajun writers use to explore and sustain the Cajun identity and collective memory

Dealing with Disaster
Saundra K. Schneider, 2014-12-18 Now updated with examples through 2010 this classic study examines the disruptive effects of disasters on patterns of human behavior and the operations of government and the conditions under which even relatively minor crises can lead to system breakdown

Pilot study on the experiences of hurricane shelter evacuees Laura DiGrande, Lisa Carley-Baxter, Christine Bevc, Suzanne Triplett, Craig William, Lewis-Owen, Jessica Williams, 2019-09-11
Community members who evacuate to shelters may represent the most socially and economically vulnerable group within a hurricane s affected geographic area Disaster research has established associations between socioeconomic conditions and adverse effects but data are overwhelmingly collected retrospectively on large populations and lack further explication As Hurricane Florence approached North Carolina in September 2018 RTI International developed a pilot survey for American Red Cross evacuation shelter clients Two instruments an interviewer led paper questionnaire and a short message service SMS text questionnaire were tested A total of 200 evacuees completed the paper survey but only 34 participated in the SMS text portion of the study Data confirmed that the sample represented very marginalized coastline residents 60 percent were unemployed 70 percent had no family or friends to stay with during evacuation 65 percent could not afford to evacuate to another location 36 percent needed medicine medical care and 11 percent were homeless Although 19 percent of participants had a history of evacuating for prior hurricanes disasters and 14 percent had previously utilized shelters we observed few associations between previous experiences and current evacuation resources behaviors or opinions about safety This study demonstrates that for vulnerable populations exposed to storms of increasing intensity and frequency traditional survey research methods are best employed to learn about their experiences and needs

The Legacy of Hurricane Mitch Marisa O. Ensor, 2022-05-10 Around the world disaster vulnerability is on the rise The incidence and intensity of disasters have increased in recent decades with lives being shattered and resources being destroyed across broad geographic regions each year As it swept across the Honduran landscape the exceptional size power and duration of Hurricane Mitch abruptly and brutally altered the already diminished economic social and environmental conditions of the population In the aftermath of the disaster a group of seven socio environmental scientists set out to investigate the root causes of the heightened vulnerability that characterized pre Mitch Honduras the impact of the catastrophe on the local society and the subsequent recovery efforts Edited by Marisa O Ensor this volume presents the findings of their investigation

The Legacy of Hurricane Mitch offers a comprehensive analysis of the immediate and long term consequences of Hurricane Mitch in Honduras Based on longitudinal ethnographic fieldwork and environmental assessments this volume illustrates the importance of adopting an approach to disaster research and practice that places natural trigger events within their political cultural and socio economic contexts The contributors make a compelling case against post disaster recovery efforts that limit themselves to alleviating the symptoms rather than confronting the root causes of the vulnerability that prefigured the disaster

Powerless Diana Hernández, Jennifer Laird, 2025-04-08 Energy serves as the lifeblood of our daily experiences It permeates virtually every aspect of our existence facilitating nourishment safety and productivity When affordability threatens energy's availability a family's living situation can become untenable too cold too hot too dark and too often unhealthy and unsafe In *Powerless* sociologists Diana Hernández and Jennifer Laird reveal the hidden hardship of energy insecurity the inability to adequately meet household energy needs Approximately one in ten households in the U S are energy insecure and four in ten are at risk for energy insecurity These statistics alone do not convey the acute pain of utility shutoffs or the relentless toll of chronic energy hardships marked by difficult choices and harsh living conditions Drawing on survey data and interviews with one hundred energy insecure individuals and families Hernández and Laird detail the experience of energy insecurity Individuals and families suffering from energy insecurity endure economic hardships such as difficulty paying utility bills utility debt and disconnection from utility services They also struggle with physical challenges such as poor housing conditions and poor or dysfunctional heating and cooling systems They are often forced to make difficult choices about what bills to pay These decisions are sometimes referred to as heat or eat choices as families cannot afford to pay for heating and food at the same time Energy insecure individuals and families employ a variety of strategies to keep energy costs down to avoid having to make these hard choices This includes deliberate underconsumption of energy enduring physical discomfort and using dangerous alternatives such as open flames ovens or space heaters to try to maintain a comfortable temperature in their home To be energy insecure is to suffer Despite the heavy toll of energy insecurity most people confront these difficulties behind closed doors believing it is a private matter Thus the enormous social crisis of energy insecurity goes unnoticed Hernández and Laird argue that household energy is a basic human right and detail policies and practices that would expand access to consistent safe clean and affordable energy Their proposals include improving the current energy safety net which is limited and often does not serve the most energy insecure due to stringent program requirements and administrative burdens They also suggest redesigning rates to accommodate income promoting enrollment and expansion of discount programs reforming utility disconnection policies improving energy literacy and ensuring an equitable shift to renewable energy resources *Powerless* creates a comprehensive picture of the complex social and environmental issue of energy insecurity and shows how energy equity is not just an aspiration but an achievable reality

Another Day in the Death of America Gary Younge, 2016-10-04 Winner of the 2017 J Anthony Lukas Prize Shortlisted for

the 2017 Hurston Wright Foundation Award Finalist for the 2017 Helen Bernstein Book Award for Excellence in Journalism Longlisted for the 2017 Andrew Carnegie Medal for Excellence in Non Fiction On an average day in America seven children and teens will be shot dead In Another Day in the Death of America award winning journalist Gary Younge tells the stories of the lives lost during one such day It could have been any day but he chose November 23 2013 Black white and Latino aged nine to nineteen they fell at sleepovers on street corners in stairwells and on their own doorsteps From the rural Midwest to the barrios of Texas the narrative crisscrosses the country over a period of twenty four hours to reveal the full human stories behind the gun violence statistics and the brief mentions in local papers of lives lost This powerful and moving work puts a human face a child s face on the collateral damage of gun deaths across the country This is not a book about gun control but about what happens in a country where it does not exist What emerges in these pages is a searing and urgent portrait of youth family and firearms in America today

Institutional Racism Shirley Better, 2008 In the United States the economic exploitation of non white groups has included the reliance on African American slave labor by Southern plantation owners the systematic removal of Native Americans from their homelands to make room for white settlers and the relegation of non white workers to the most low paid dangerous and dirty jobs Through numerous examples Shirley Better demonstrates that racism is embedded within the fabric of American society restricting equal access to educational opportunities employment and housing Having outlined the causes and effects of institutional racism the Better presents numerous strategies for individuals and groups to combat this pervasive social problem

Where Tapirs and Jaguars Once Roamed Jack Ewing, 2016-10-03 In the last century the south central Pacific coast of Costa Rica evolved from a wild remote strip of land to one sparsely populated by homesteaders who cleared the forests to live off the land Now it is a popular tourist destination filled with diverse wildlife in the abundant rainforests Join author Jack Ewing as he reveals the ever changing and fascinating history of the area and recounts his 45 year journey from managing a cattle ranch to developing Hacienda Bar into a National Wildlife Refuge And discover how his

efforts with the Path of the Tapir Biological Corridor may one day bring jaguars and tapirs back to the area Katrina Eric Dunbar, 2005 In August of 2005 while the southern region of the United States braced for the impact of Hurricane Katrina Eric began writing giving birth to his book release KATRINA In the Aftermath of a Killer Little did he know that Katrina would develop into a category 5 hurricane before slamming the city of his birth totally devastating the Crescent City Hurricane Katrina is without a doubt one of if not the most devastating hurricane to impact the continental United States in this century Marooned in a lifeless city for five days Author Eric Dunbar describes his personal experiences in the aftermath of Hurricane Katrina as she unleashed her fury on one of the nation's heavily populated cities the city of New Orleans Could there have been a faster response on the part of the United States Government Was it bad judgment or lack of ability on the part of thousands of people who chose to stay as opposed to leaving These are just a few questions that Eric seeks to answer Learn the real reason why thousands of people did not evacuate in the wake of this devastating monster Recent Hurricane Research Anthony Lupo, 2011-04-19 This book represents recent research on tropical cyclones and their impact and a wide range of topics are covered An updated global climatology is presented including the global occurrence of tropical cyclones and the terrestrial factors that may contribute to the variability and long term trends in their occurrence Research also examines long term trends in tropical cyclone occurrences and intensity as related to solar activity while other research discusses the impact climate change may have on these storms The dynamics and structure of tropical cyclones are studied with traditional diagnostics employed to examine these as well as more modern approaches in examining their thermodynamics The book aptly demonstrates how new research into short range forecasting of tropical cyclone tracks and intensities using satellite information has led to significant improvements In looking at societal and ecological risks and damage assessment authors investigate the use of technology for anticipating and later evaluating the amount of damage that is done to human society watersheds and forests by land falling storms The economic and ecological vulnerability of coastal regions are also studied and are supported by case studies which examine the potential hazards related to the evacuation of populated areas including medical facilities These studies provide decision makers with a potential basis for developing improved evacuation techniques **The Washington Post Index**, 2008 Une journée dans la mort de l'Amérique Gary Younge, 2017-10-04 Chaque jour ce sont près de sept enfants ou adolescents qui meurent par balle aux tats Unis Cette statistique glaçante ne peut rendre compte elle seule des vies détruites par les armes feu Gary Younge a donc décidé de raconter le destin des jeunes gens tués au cours d'une journée choisie au hasard Ils sont dix treize abattus le 23 novembre 2013 dix enfants et adolescents âgés de 9 à 19 ans sept noirs deux hispaniques un blanc Gary Younge consacre un chapitre chacune de ces victimes tués par balle parfois par accident parfois lors d'un règlement de comptes Jaiden Kenneth Stanley Pedro Tyler Edwin Samuel Tyshon Gary et Gustin En recoupant les entretiens qu'il a menés avec leurs proches les rapports de la police du 911 et des journalistes locaux il reconstitue la vie et les dernières minutes de ces jeunes victimes de leur

condition sociale de la négligence des adultes des lobbys Vibrante immersion dans ces dix courtes vies Une journée dans la mort de l'Amérique est un ouvrage aussi précis qu'intense Gary Younge déploie tout son savoir faire narratif pour nous immerger dans les tats Unis d'aujourd'hui et nous inviter à réfléchir sans tabou cette tragédie américaine Courage and Consequence Karl Rove, 2010-04-03 From the moment he set foot on it Karl Rove has rocked America's political stage He ran the national College Republicans at twenty two and turned a Texas dominated by Democrats into a bastion for Republicans He launched George W Bush to national renown by unseating a popular Democratic governor and then orchestrated a GOP White House win at a time when voters had little reason to throw out the incumbent party For engineering victory after unlikely victory Rove became known as the Architect Because of his success Rove has been attacked his entire career accused of everything from campaign chicanery to ideological divisiveness In this frank memoir Rove responds to critics passionately articulates his political philosophy and defends the choices he made on the campaign trail and in the White House He addresses controversies head on from his role in the contest between Bush and Senator John McCain in South Carolina to the charges that Bush misled the nation on Iraq In the course of putting the record straight Rove takes on Democratic leaders who acted cynically or deviously behind closed doors and even Republicans who lacked backbone at crucial moments Courage and Consequence is also the first intimate account from the highest level at the White House of one of the most headline making presidencies of the modern age Rove takes readers behind the scenes of the bitterly contested 2000 presidential contest of tense moments aboard Air Force One on 9 11 of the decision to go to war in Afghanistan and Iraq of the hard won 2004 reelection fight and even of his painful three years fending off an indictment by Special Prosecutor Patrick Fitzgerald In the process he spells out what it takes to win elections and how to govern successfully once a candidate has won Rove is candid about his mistakes in the West Wing and in his campaigns and talks frankly about the heartbreak of his early family years But Courage and Consequence is ultimately about the joy of a life committed to the conservative cause a life spent in political combat and service to country no matter the costs **Mi María: Surviving the Storm** Ricia Anne Chansky, Marci Denesiuk, 2021-09-04 When Hurricane Maria made landfall in Puerto Rico in September 2017 it left no part of the archipelago unscathed The hurricane triggered floods and mudslides washed out roads destroyed tens of thousands of homes farms and businesses caused the largest blackout in US history knocked out communications led to widespread food drinking water and gasoline shortages and caused thousands of deaths The seventeen oral histories collected in Mi María: Surviving the Storm share stories of surviving the storm and its long aftermath as people waited for relief and aid that rarely arrived Zaira and her husband floated on a patched air mattress for sixteen hours while floodwaters rose around them The road washed out in front of Emmanuel as he desperately tried to drive his pregnant wife who had begun labor to the hospital Luis and his father anxiously counted the days that the dialysis clinic remained closed and lifesaving treatment was unavailable while Miliana's mother was sent home from the hospital undiagnosed only to fall critically ill in her own home

Weaving together long form oral histories and shorter testimonios the book offers a multivocal peoples history of disaster that fosters a greater understanding of the failures of governmental disaster response and the correlating perseverance of the people impacted by these failures highlighting the colonial relationship between Puerto Rico and the United States Ultimately the ways in which these oral histories demonstrate the strength of community response to disaster in Puerto Rico are pertinent to other parts of the world that are being impacted by our current climate emergency

The Cure for Catastrophe Robert Muir-Wood,2016-09-06 We can t stop natural disasters but we can stop them being disastrous One of the world s foremost risk experts tells us how Year after year floods wreck people s homes and livelihoods earthquakes tear communities apart and tornadoes uproot whole towns Natural disasters cause destruction and despair But does it have to be this way In The Cure for Catastrophe global risk expert Robert Muir Wood argues that our natural disasters are in fact human ones We build in the wrong places and in the wrong way putting brick buildings in earthquake country timber ones in fire zones and coastal cities in the paths of hurricanes We then blindly trust our flood walls and disaster preparations and when they fail catastrophes become even more deadly No society is immune to the twin dangers of complacency and heedless development Recognizing how disasters are manufactured gives us the power to act From the Great Lisbon Earthquake of 1755 to Hurricane Katrina The Cure for Catastrophe recounts the ingenious ways in which people have fought back against disaster Muir Wood shows the power and promise of new predictive technologies and envisions a future where information and action come together to end the pain and destruction wrought by natural catastrophes The decisions we make now can save millions of lives in the future Buzzing with political plots newfound technologies and stories of surprising resilience The Cure for Catastrophe will revolutionize the way we conceive of catastrophes though natural disasters are inevitable the death and destruction are optional As we brace ourselves for deadlier cataclysms the cure for catastrophe is in our hands
